Potash/Potassium Salts

Potash is a mined material and is the basic building block for all potassium salts and potassium hydroxide.

Downstream materials of Potash include:

Potassium Hydroxide	Potassium Iodate
Potassium Permanganate	Potassium Persulfate
Potassium Carbonate	Potassium thiocyanate
Potassium Chloride	Potassium Sulfate
Potassium Iodine	Potassium Chlorate
Potassium Nitrate	Potassium Fluoride
Potassium Dichromate	Potassium Bromate
Potassium Phosphate	Potassium Citrate
Potassium Acetate	Potassium Gluconate
Potassium Cyanide	

Potash Mining Companies include:

- | | |
|------------------------|-----------------------------|
| a) Potash Corp | k) Reward Minerals. |
| b) Agrium Inc. | l) South Boulder Mines Ltd. |
| c) The Mosaic Company | m) Lithium Americas Corp. |
| d) BHP | n) Phoscan Chemical Corp. |
| e) Rio Tinto. | o) Potash Minerals Limited |
| f) Compass Minerals | p) Encanto Potash Corp. |
| g) Sirius Minerals Plc | |
| h) Intrepid Potash. | |
| i) Orocobre | |
| j) Elemental Minerals | |
