ALCOHOL and CRIME in WYOMING

Wyoming Association of Sheriffs and Chiefs of Police

WYOMING DEPARTMENT OF TRANSPORTATION – Highway Safety Program

ALCOHOL AND CRIME IN WYOMING: 2011

April 2012

The analysis of the data collected by the Wyoming Association of Sheriffs and Chiefs of Police and the printing of this report was made possible through the assistance of Federal 402 Highway Safety funds received from the Wyoming Department of Transportation – Highway Safety Program. The Project was managed by Johnson and Associates of Douglas, Wyoming. The report was authored by Ernest L. Johnson, Director of Services.

INTRODUCTION

In spring of 2005, the Wyoming Association of Sheriffs and Chiefs of Police received grant funding from the Wyoming Department of Transportation – Highway Safety Program to collect and evaluate alcohol-related arrest data in ten counties in Wyoming for a period of six months. Although it had long been suspected that alcohol was a factor in a large number of custodial arrests in Wyoming, reliable data had not been available previously to more accurately determine the scope and impact of alcohol on crime in this state.

The data collection process has continued since 2005, has been refined and was expanded to include data

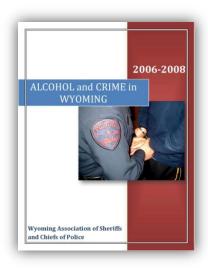

collection in all twenty-three counties in 2006. The collection of data was extended to a full twelve-month period in 2008 and the data collection process has now been institutionalized as a part of the book-in process for all custodial arrests.

A sufficient amount of alcohol-related arrest data has now been collected during the course of these past seven years which can be analyzed for the purpose of identifying trends in alcohol involvement in crime in Wyoming. Consistent patterns of alcohol involvement for certain crimes are now more evident and the times when these crimes are occurring more predictable.

To date, information has been collected from a total of 99,872 persons who were arrested and subsequently detained in a detention facility in Wyoming. Specific information collected during the book-in process includes the following:

- > Type of offense
- Whether alcohol or drugs were involved
- Location of last consumption and point of sale
- ➤ Known blood alcohol content levels for alcohol related arrests; and
- > Demographic information

Although the data fields and the process for collection have been standardized and relatively consistent for the first five years, the time periods for collection and reporting were not. This was due mainly to the timing and availability of grant funding. This inconsistency in reporting periods made it difficult to compare statistics from year-to-year, as well as with state traffic crash data. Beginning in 2010, the data collection and analysis is now an ongoing process and the report will be published annually on a calendar-year basis.

The Wyoming Association of Sheriffs and Chiefs of Police publish the results and analysis of the data collection efforts each year in two separate reports. The main report provides statewide statistics and averages, along with comparisons of county statistics in specific categories. The

accompanying supplemental report provides county, community and local law enforcement agency specific statistics. These reports can be accessed online on the following websites:

http://wascop.com and http://jandaconsulting.com

The information collected from a total of 19,003 persons who were arrested and subsequently detained in a county detention facility in Wyoming during this twelve-month period (January 1 through December 31, 2011) confirms what law enforcement officers who patrol the highways and

who respond to calls for service in Wyoming already know from experience – alcohol is the major contributing factor in situations that result in someone going to jail.

EXECUTIVE SUMMARY

This Executive Summary highlights a few of the significant findings contained in this report. It focuses on issues that are of obvious concern or which may be of greater interest to the general public; however, a careful review of other relevant findings and statistics contained in the main body of this report is essential in order to gain a more complete perspective of the impact of alcohol on crime in Wyoming.

This report contains an analysis of alcohol-related arrest information collected in all twenty-three

counties in Wyoming during a twelve-month time period (January 1, through December 31, 2011) by the Wyoming Association of Sheriffs and Chiefs of Police. *Information was collected from a total of 19,003 persons who were arrested and subsequently detained in a county detention facility.* The alcohol-related arrest data contained in this report provides a detailed, statistical picture of the impact of alcohol abuse on crime in Wyoming.

The profile of the average person taken to jail in Wyoming continues to be relatively consistent with previous years. Eight out of ten times it was a male – average age 35. Ten percent of the time it was an out-of-state visitor and 6% of the time it was an in-state visitor. Juvenile arrests that resulted in detention in a county detention facility accounted for less than 2% of the total custodial arrests.

A review of the data collected from persons arrested and subsequently taken to jail indicates that Wyoming continues to be relatively safe from what is generally considered to be "serious" crime. The number of persons who are arrested for felonies are relatively low when compared to the number of persons arrested for minor crimes (misdemeanors). Felony arrests accounted for 7% of the total arrests statewide.

Although Wyoming is relatively "safe" from what is generally considered to be serious

crime, the high percentage of alcohol-involved arrests, the inordinate number of arrests for public intoxication and driving under the influence, and the high levels of blood alcohol content for drivers arrested represent a real and significant threat to public safety.

A total of 19,003 persons were arrested statewide and taken to jail in 2011 - and more than three out of four times the arrest involved alcohol and/or other drugs.

The level of alcohol involvement reported in the 99,872 reported arrests during the last seven years indicates that alcohol is the drug that has the greatest influence on crime in Wyoming.

- ➤ Alcohol was involved in 70.14% of all custodial arrests.
- Methamphetamine was involved in 2.21% of the 19,003 reported arrests.
- ➤ Other drugs were involved in 9.6% of the reported arrests.
- Arrests for public intoxication accounted for 18.72% of all arrests.
- \triangleright The average blood alcohol content for persons arrested for public intoxication was 0.2583.
- ➤ Driving under the influence arrests accounted for 32.06% of all arrests.
- \triangleright The average reported blood alcohol content for DUI arrests statewide was 0.1545.¹
- ➤ 46% of persons arrested for DUI had a reported BAC level above <u>0.16</u> and 8% had a BAC of <u>0.24</u> or greater.
- ➤ The average reported BAC for 609 persons who were arrested for DUI after being involved in a traffic crash was 0.1685.
- ➤ The age group (in 5-year increments) with the highest percentage of DUI arrests was age 21-25 (19%), followed by age 26-30 (16%) and 31-35 (11%).

_

 $^{^1}$ In Wyoming, a person driving with a blood alcohol content of $\underline{0.08}$ is legally presumed to be impaired.

In order to grasp the significance of these blood alcohol content statistics, it should be noted that a physically fit male who weighs 180 pounds would have to consume at least seven drinks in one hour in order to achieve a BAC of <u>0.15</u> – a female weighing 120 pounds would have to consume five drinks in one hour.

Please refer to the Alcohol Impairment Educational Guides for males and females in the Attachments Section of this report for information about the level of impairment for other body weights and drinks consumed.

PUBLIC CONCERNS

The statistics contained in this report identify significant public safety issues which merit further discussion, analysis and action by local law enforcement, citizens and state/community leaders

The high percentage of alcohol involved arrests (70.14%), the inordinate number of arrests for public intoxication (4,473) and DUI (5,199) and the high levels of BAC recorded for these individuals (average BAC: 0.2583 for public intoxication and 0.1545 for DUI) appear to validate the concerns about alcohol abuse expressed by Wyoming residents in the most recent statewide public opinion survey².

Some excerpts from the survey that involved 4,699 Wyoming residents:

- > 77.8% view alcohol abuse by Wyoming adults as a serious or somewhat serious problem
- ➤ When Wyoming residents were asked whether they would support a state law that would prohibit selling or serving alcohol to someone who is obviously intoxicated:
 - o 76.8% strongly supported such a law
 - o 13.6% somewhat supported such a law
- ➤ 86.8% of Wyoming residents believe that drinking and driving in their community is a serious or somewhat serious problem.

This report provides statewide statistics and averages, along with comparisons of county statistics in specific categories. In addition, there are approximately one hundred pages of data in a supplemental report that provides county, community and local law enforcement agency specific statistics.

² Wyoming Alcohol Use Issues Survey, Wyoming Survey & Analysis Center, October 2006

SIGNIFICANT STATISTICS AND FINDINGS

The percentage of alcohol-involved arrests in Wyoming, the number of arrests for public intoxication and driving under the influence and the reported high level of blood alcohol content for persons arrested during the past seven years provides statistical evidence of the impact that the abuse of alcohol is having on crime in Wyoming.

Detailed charts and graphs included in the Data/Statistics section of this report are helpful in identifying trends involving alcohol-related arrest activity and provide a statistical picture of the circumstances which

result in someone being arrested and subsequently taken to jail in Wyoming. The impact of substance abuse on crime statistics varies by county across the state. This report also includes a detailed analysis by county for comparison purposes.

Listed below are a few of the noteworthy statewide averages and county specific alcohol-related statistics and findings in this report.

- > Alcohol was a factor in 70.14% of the custodial arrests in Wyoming.
 - o Counties with significantly higher statistics:
 - Crook 89.06%
 - Weston 87.80%
 - Teton 84.69%
- > Alcohol was involved in 72.86% of all misdemeanor arrests.
- ➤ Methamphetamine was involved in 2.21% of the arrests statewide.
 - Counties with significantly higher statistics:
 - Sweetwater -6.45%
 - Converse 5.12%
 - Uinta 4.85%
- > "Other" drugs were involved in 9.98% of the reported arrests statewide.
 - Counties with significantly higher statistics:
 - Hot Springs 25.00%
 - Platte 24.00%
 - Lincoln 23.63%
 - Johnson 22.63%

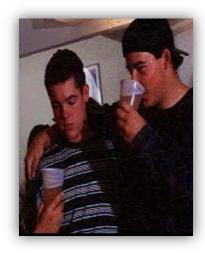

- Arrests for Public Intoxication accounted for 18.72% of all arrests statewide. (The statewide average does not include 1,438 persons who were admitted into the Fremont County Alcohol Crisis Center for public intoxication)
 - o Counties with significantly higher statistics:
 - Fremont 36.16%
 - Teton 29.87%
 - Hot Springs 24.89
- ➤ The average blood alcohol content for all persons arrested for public intoxication was 0.2583.
 - O Counties with significantly higher statistics:
 - Platte 0.3050
 - Fremont -0.2723
 - Sublette <u>0.2595</u>
 - > Driving under the influence (DUI) arrests accounted for 32.06% of all arrests statewide.
 - Counties with significantly higher statistics:
 - Weston 70.73%
 - Crook 68.75%
 - Big Horn 59.40%
 - > 2.41% of the arrests for DUI involved drugs;
 - Counties with significantly higher statistics:
 - Platte 17.00%
 - Crook 10.94%
 - Lincoln 8.02%
 - ➤ The average blood alcohol content (BAC) reported for 5,199 persons arrested for driving under the influence statewide was 0.1545.

- o Counties with significantly higher statistics:
 - Weston 0.1812
 - Hot Springs 0.1739
 - Big Horn <u>0.1671</u>
- > 10.64% of traffic crashes resulting in arrests involved drugs.
 - o Counties with significantly higher statistics:
 - Converse 28.67%
 - Carbon 23.08%
 - Sublette 21.43%
- ➤ The average BAC reported for 724 traffic crashes that involved alcohol was <u>0.1685</u>.

46% of the persons arrested for driving under the influence had average blood alcohol content above 0.16.

- o 8% had a BAC of <u>0.24</u> or greater
- o 13% had a BAC between 0.20 and 0.239
- o 25% had a BAC between 0.16 and 0.199
- > 7.25% of all persons arrested for driving under the influence (DUI) were under the age of 21.

- > Juveniles accounted for 1.1% of the arrests statewide.
 - It should be noted that the data in this report does not represent a complete accounting of juvenile arrests as these arrests often do not result in detention in a county facility.
- **→** 40.74% of the juvenile arrests involved alcohol.
- > 1.85% of the juvenile arrests involved methamphetamine.
- > 17.13% of the juvenile arrests involved "other" drugs.
- > 370 minors arrested for alcohol-related offenses

reported obtaining alcohol at:

- o Party 29.19%
- \circ Home 28.65%
- Bar 21.62%
- Liquor Store 20.27%
- o Drive-up − <1%

TRENDS ANALYSIS/TRAFFIC CRASH DATA

This report also provides graphs that begin to provide a longitudinal view of the statistics which have a direct bearing on public safety. Specifically, these charts track the numbers and percentages of persons arrested which involved alcohol, for public intoxication and for driving under the influence for the previous two years.

Because many of the arrests in Wyoming involve traffic crashes, this report has also, for the first time, incorporated alcohol-involved crash data collected by the Wyoming

Department of Transportation. Graphs that track the number and percentage of alcohol-involved traffic crashes and traffic fatality crashes in Wyoming for the past two years are now included as a part of this report.

PROJECT DESIGN AND IMPLEMENTATION

The Wyoming Association of Sheriffs and Chiefs of Police contracted with Johnson and Associates, a Wyoming based management consulting firm, to manage and staff this project – to create the master database, to collect and input data, to make presentations to select groups and to author the final report. The Association has contracted with Johnson and Associates to manage and staff this project since its inception.

A task force comprised of administrators and detention facility personnel from each of the county law enforcement agencies involved in the initial data collection efforts in 2005 determined the scope and intent of the project and provided specific direction for its implementation. In the following years, all law enforcement and detention facility administrators in the state were involved in deciding the appropriate fields for collection of data, selecting the subject areas that would be targeted for analysis and refining the process and procedures for collecting the information.

A supply of reporting forms and self-addressed stamped envelopes were provided to all detention facilities in the state - along with an instruction sheet for processing the completed reporting forms. In addition, all detention facility personnel who were assigned the responsibility to oversee their agencies' data collection were provided individual orientations. All completed reporting forms were submitted to Johnson and Associates for data entry on a weekly basis.

The master database for this project was created in a manner that will allow "harvesting" of additional information in the future should a need or particular area of interest arise. The data in this report is presented by "county" and by "department," by actual numbers and percentages, and by various categories of interest. The information was assembled in this manner in order to assist law enforcement administrators, as well as community leaders, to better analyze the information and to facilitate follow-up inquiries of notable concerns.

DATA COLLECTION

A one-page reporting form consisting of fill-in or checked boxes was constructed and refined during the course of this project. It is estimated that the form requires the booking and/or arresting officer two-to-three minutes to fill out during the book-in process. Specific information that was collected during the book-in process include: type of offense, whether alcohol was involved; whether drugs were involved; location of last consumption and point of sale; known blood alcohol content levels for arrests involving

public intoxication, driving under the influence and minors in possession; and demographic information. (Please refer to page 50 for a sample of the reporting form)

A total of 19,003 reporting forms were submitted by the twenty-three county detention facilities and the Fremont County Alcohol Crisis Center during the twelve-month data collection period January 1 through December 31, 2011. Although officers were instructed to complete a form for every person booked into the detention facility, they did not always do so. The reports submitted during 2011 represent 91.82% of all persons booked into a county detention facility (as verified through an independent process). Completion numbers by county can be found on page 48.

DATA /STATISTICS

All information contained in the reporting forms that were submitted by the participating counties was entered into a master data base by week and by month. This information was subsequently assembled by category, by county, and by department in order to facilitate appropriate comparisons and further analysis.

A detailed breakdown of information for each county is available in a separate Supplemental Report.³ A sample of the county statistics is included in this report. Natrona County was selected as the sample to be included as this county generated the greatest number of arrest statistics.

The alcohol-related arrest data in this report is presented in a series of tables and graphs:

- ❖ Tables Number of Arrests and Percentages
- ❖ Pie Chart Methamphetamine, Alcohol and Other Drugs
- ❖ Tables Felony/Misdemeanor Arrests Involving Alcohol
 - Alcohol Involvement by Category of Arrest
- ❖ Bar Graphs Alcohol Arrests Percentages, BAC
- ❖ Pie Graphs DUI, BAC, Traffic Crash Statistics
- ❖ Tables and Bar Graphs Juvenile Statistics
- ❖ Pie Graph Juvenile Demographics, Where Minors Obtain Alcohol
- **❖** Table Natrona County Statistics (Sample County Statistics)
- ❖ Table Total reports compared to Actual Custodial Arrests
- ❖ 2010-2011 Selected Statistics Comparisons
- 2010-2011 Traffic Crash Statistics

³ A PDF of this Supplemental Report can be downloaded from the following websites: http://wascop.com and http://jandaconsulting.com

ACKNOWLEDGEMENTS

This project was accomplished due to the committed support of all the law enforcement administrators in Wyoming, and in particular, the Sheriffs' generous commitment of agency resources. The day-to-day supervision and weekly submittal of the project reporting forms and the individual efforts of the hundreds of arresting/detention officers who filled out the reporting forms should be acknowledged as well. Their collective efforts were absolutely essential to the overall success of this project.

RELATED EDUCATION & EXPERIENCE:

- > Twenty-four years experience as an administrator of a state agency with direct responsibility for budget development and administration, planning, organizing, directing, staffing, and program services delivery.
- Masters degree in Public Administration; over thirty-five years experience training and working with executives to achieve excellence in government, manage and implement change, increase organizational effectiveness and maximize program efficiency.
- Conducted in-depth management studies for criminal justice agencies for the states of Massachusetts and New Hampshire. These studies assessed the delivery of program services by agencies with statewide responsibilities and provided recommendations for increasing organizational efficiency and agency credibility.
- ➤ Over thirty-five years of experience in researching, writing, and administering a variety of federal and state grants. Grants involved in excess of several million dollars for a wide variety of purposes: personnel, equipment, training, research and providing services with targeted priorities.
- Extensive experience in researching, evaluating and implementing a wide variety of projects. These projects varied in scope and duration, and many required the involvement and partnership of multiple agencies and personnel throughout the state, as well as the enactment of state legislation.
 - Evaluation performed for the Substance Abuse Division WDH "Responsible Server Training Program" - October 2002
 - Managed the Wyoming First Lady's Initiative to Reduce Underage Drinking November 2004 to September 2006
 - o Currently serving as the Facilitator for the Wyoming Seat Belt Coalition
 - Managed project and authored report: A Comprehensive Review of Alcohol State Statutes: Findings and Recommendations for Reducing Underage and Binge Drinking in Wyoming – 2008
 - Management Review of the Wyoming Seat Belt Coalition: Mission, Goals and Work Scope – September 2011

Alcohol and Crime in Wyoming - 2011

- ➤ Thirty years of experience in conducting a variety of feasibility studies
 - o Conducted numerous feasibility studies for the Wyoming Legislature
 - Most recent feasibility study conducted for the Town of Wright: "Should the Town of Wright create its own Police Department?" May 2004
- Conducted executive level training for the US Department of Justice/ State Department:
 - o Instructed a 40-hour training course entitled "The Office of Professional Responsibility" for the Lithuania National Police command staff 2001
 - Instructed an 80-hour training course entitled "Sex Crimes Investigations" for Investigators and Prosecutors in Lithuania - 2001
- ➤ Faculty Criminal Justice Department University of Wyoming (September 2000 to present)
 - Criminal Justice Management, Concepts of Modern Policing, Ethics in the Administration of Justice, Criminal Justice Civil Liability, Politics and the Judicial Process, Criminal Courts and Processes, and Police Deviance.
- Management consultant for the Wyoming Association of Sheriffs and Chiefs of Police -Projects completed or currently in progress:
 - o Evaluation of Alcohol Factors in Custodial Arrest in Wyoming May 2005
 - Statewide Public Opinion Survey: Alcohol Issues and Policies (phone survey of 4,600 residents of Wyoming – Report released November 2006
 - Evaluation of Alcohol Factors in Custodial Arrests in Wyoming 2006: Phase I (data collection), Phase II (Analysis, Findings and Strategies)
 - Evaluation of Alcohol Factors in Custodial Arrests in Wyoming 2007, 2008, 2009
 - o Alcohol and Crime in Wyoming: 2006 2008
 - o Alcohol and Crime in Wyoming: 2010
 - Project Manager for the Enforcing Underage Drinking Laws Program September 2007 to May 2009
 - Project Manager for WY-CIA Wyoming Communities in Action Phase I, Phase II September 2007 to May 2009
 - Project Manager for Reducing Underage Drinking and Driving October 2007 to September 2009
 - Project Coordinator for Project Safe Neighborhoods in Wyoming: A national initiative directed by the US Department of Justice aimed at reducing gun crimes and violence in this country. Initiative is currently in its sixth year of operation in Wyoming.
- Facilitator/Coordinator for the Wyoming Seat Belt Coalition December 2006 to present

ALCOHOL AND CRIME IN WYOMING: 2011

April 2012

The analysis of the data collected by the Wyoming Association of Sheriffs and Chiefs of Police and the printing of this report was made possible through the assistance of Federal 402 Highway Safety grant funds received from the Wyoming Department of Transportation – Highway Safety Program. The project was managed by Johnson and Associates of Douglas, Wyoming. This report was authored by Ernest L. Johnson, Director of Services.
