

PRODUCT DATA SHEET

CIK – CRAWLING INSECT KILLER

DESCRIPTION

A totally unique solvent based formulation, which utilizes a Tetramethrin, Permethrin and Piperonyl Butoxide mixture to effectively kill and control crawling insects of many kinds. A combination of professional strength, high power solvent and a powerful insecticide concentrate help this spray penetrate insect exoskeletons and deliver active killing ingredients directly to the insect's nervous system. Features a non-flammable spray and has no unpleasant odor. Unique pencil thin spray aids in treating around windows, doors, cracks, crevices and in hard to reach areas. Provides up to a 4-week residual killing action.
