The Chickaroo Classic was established in 2008 to honor our daughter Caroline (the Chickaroo), who was diagnosed with a Pediatric Low Grade Astrocytoma (PLGA) in 2007 when she was just six-years old. She's endured 4 chemotherapy protocols (3 being experimental), 3 brain surgeries, and so much more in an effort to halt the growth of a plum sized mass and numerous other lesions within her brain and spine. She has lost all usable vision in her left eye and has no right peripheral vision. She is presently enrolled in a clinical trial at St. Jude Children's Research Hospital. Through all this, Caroline has never complained and remains positive and hopeful.

PLGAs are the most common pediatric brain tumors. There is no cure for PLGAs, and many, such as Caroline's, are inoperable. First line chemotherapy for PLGAs has not changed in over 30 years and is toxic, ineffective, and causes significant and permanent collateral damage to growing children.

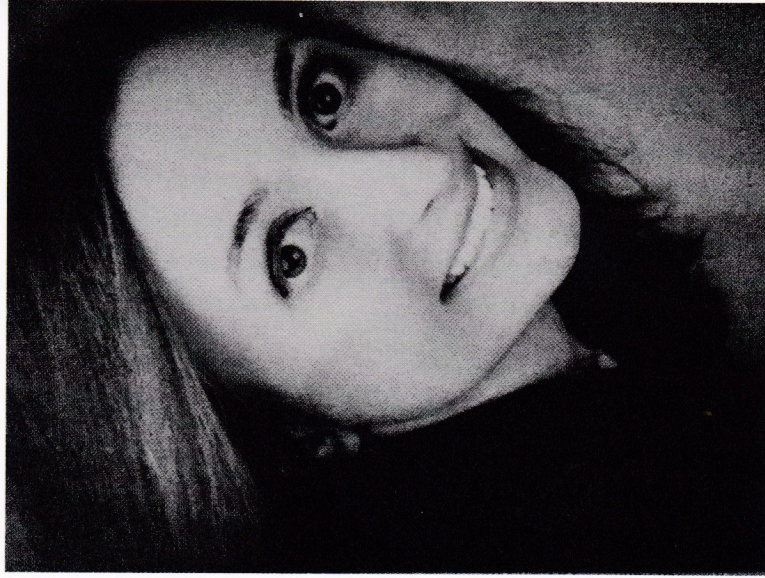

Since 2007, Team Chickaroo has raised over \$800,000 for PLGA research. Funding by families such as ours has generated interest in PLGAs with the scientific community. More progress in understanding and treating this disease has been made in the past 5 years than ever before. Hope for the discovery of truly effective therapies is now quite real. The greatest obstacle to NEW research remains the lack of funding. All proceeds from the Chickaroo Classic will fund research at Dana-Farber Cancer Institute's PLGA laboratories.

Thank you for your generous support.

Most sincerely,

Rick and Sarah Hamilton

The Tenth
