

Multi Use Mobile Structural Fire Trainer

A Multi-Use Mobile Structural Fire Trainer that contains both LPG and Class A burners, a search and rescue confidence maze, as well as multiple other training features. This system is fully portable and contains all elements needed to be self-sufficient. (For a list of the features in this unit, please scroll to the last page of this document).

The unit shown in these photos was recently delivered to Ann Arbor, Michigan and was funded through the AFG program.
