

What if your Body is more conscious than you are?

Elimination and Eradication of Bio Mimetic Mimicry of other People's Pains, Pathways and Realities

Changes where we create our lives and our bodies from mimicking others instead of from our choice.

Cellular Memory

Unlocking the cells from memory of trauma and scar tissue, this is extremely powerful for animals too.

Molecular Terminal Valence Sloughing System (MTVSS)

Tool of choice for undoing almost any way the body is malfunctioning. It can have a major effect on the immune system, especially when done on the joints.

Lymphatic Glandular Incongruities & Inconsistencies

Works with the lymph and glandular system primarily for hearing, ears and sinus congestion problems.

De-Molecular Manifestation and Molecular De-Manifestation

Where something is occurring in the body which is not what should occur, or not occurring when it should. Works with any condition from arthritis to tumors to moles where something extra has grown, or something is required is not as abundant as it should be.

Trifold Sequencing Systems of Drug Induced Scenarios

Relates to everywhere we've made perfectionism the most important component of our lives, creating the insanity of perfectionism. It can assist in undoing any decisions, judgments, conclusions and computations made while under the influence of drugs that a person keeps going back to or reacting from.

Restoration of Structural Integrity & Function

Restores the body's structural integrity for optimal function

Restoration of Infinite Flexibility

This process may create more flexibility of beingness as well as flexibility in the body.

Restoration of Hyperventilation

Increases our capacity for oxygen to all of our Being.

Source Field for Elimination & Eradication of the Chromatics of Time

Dispelling wrinkles and getting the vibrancy back into the skin is only part of the possibilities with this energy process.

Oldings

This process undoes the effects of aging. One does not age, one olds.

Positional HEPADS

For every fixed point of view your take, (Handicapping, Entropy, Paralysis, Atrophy, Destruction) you start to handicap yourself about what can occur instead creating chaos instead of harmony.

Anaphylactic Shock and Quadrate of Laxation

As we get older, we create bodies which are less flexible essentially locking up our bodies in an anaphylactic shock system which is where the body begins to lock up and create all the systems of aging – like the whiplash reaction to being stung by a bee.

The quadrate of laxation is the way we get overworked, tires muscles into relaxation. Laxation is the loosening.

Trifold Sequencing Systems

Powerful for shock and trauma that was emotionally or physically shocking enough that the person tends to date their life from before or after the incident.

Zero Sum of Trauma

Undoes the effect of cumulative trauma on the body by undoing what locks the trauma into place. (ie. a concussion)

Antibodies to Consciousness

Addresses all the ways we hold ourselves away from Conscious Embodiment. *Can also be facilitated on animals.*

Eradication and Elimination of Specific Gravities

Eliminates how we have created ourselves to be heavy and serious to fit into this reality.

Reciprocating Dimensionalities

This is ran to eliminate points of view from other dimensionalities that affect your body here and now.

Eradication and Dilution of all Emotional Intensities and Restoration of the Joy of Embodiment

This is about removing the emotional intensities so you can have more Joy in your Body.

Restoration of the Intensity of Space of Embodiment and the Energizing of Joy of Embodiment

This is about creating the Space that you Be to feel the Joy that you Be.

Embodiment Of and As Space

Shows the body how to be the space between the molecules rather than defining itself as the density of this reality.

Restoration of Communion with Earth

Renews the connection with the earth for us and our bodies.

Restoration of Immortality

Restores our ability to know the wisdoms gained from lifetime to lifetime.

STDs

This addresses the generation of sexual aversion to the point of creating sexual dis-ease.

Restoration of Impregnation

Stimulates the juices of creating life forms.

Elimination & Eradication of Auto-Responder Systems of Sex and Relationship

Addresses the energy that prevents us from listening to what our body requires in sex and relationship. Instead of just automatically responding, a space of choice is ultimately created.

Thymus Exercise

Regenerates the body through the flow of acoustical energy when it requires more energy or is feeling sluggish and lethargic.

Square Root of Minus One

Allows the body to dynamically overcome what are considered to be normal human diseases.

Circuitry

Open and closed circuits are designed to malfunction; it's a stuck open or closed system and it ends up shorting the system causing your body to try to re-route messages in another direction which can overload the body and create illness. This process works on animals and people that have suffered some kind of trauma to the body targeting the neural, synaptic response systems that are physically oriented in the body that are also located through other dimensions and other realities.

Restoration of Immunocytosis

Restores the immune system for any dis-ease such as cancer.

Source Field for Elimination & Eradication of Toxic Amalgams

Toxic amalgams are part of what creates cancer in the body. This process helps transform toxic amalgams in any substance and dissipates them.

Source Field for the Elimination and Eradication of Genetically Impelled Diseases

This can work with scar tissue, bipolar, dementia, Parkinson's, schizophrenia etc.

Elimination and Eradication of the Allergic Solidification of Reality Responses of Disagreement

This process aids in the relief of auto immune system and adrenal problems (ie. Rheumatoid Arthritis).

Correcting Vision

As well as the potential for correcting vision it may also clear sinus problems.

The Physical Actualization of the Disease of Sight

Reduces the over stimulation of all that you see.

Exit Stage Left

This process helps the body remember that life or death is just a choice.

WHAT ELSE IS POSSIBLE?
