

RUN-OFF AS A PERCENTAGE OF RAINFALL

LINES AT 85%, 75%
AND 15% HAVE BEEN
DRWN FOR

FOR SELECTED DRAINAGE
BASINS IN BRITAIN

1. Draw lines at 10% intervals to show how the index of run-off as a percentage of rainfall varies across Britain
2. Describe how run-off as a percentage of rainfall varies across Britain
3. Attempt to explain this pattern
Remember the factors that affect run-off :-
 - a. Climate : Rainfall and temperature
 - b. Rock Type : Permeable or impermeable
 - c. Relief, especially steepness of slope
