

TechModular

Modular Crude Oil Refineries

- **Modular Crude Oil Refineries can be developed and designed with varying capacities of 2,000, 6,000, 12,000 & 20,000 Barrels Per Day (BPD) to refine Light or Heavy Crude Oil as Feedstock into Unleaded Gasoline, Naphtha, Diesel, Kerosene/Aviation Fuel & Fuel Oil.**
- **The Refinery Plants, Machinery and Equipment can be manufactured in Modular forms at the Manufacturers' Facilities and shipped to designated Project Sites for assembly, installation and start-up within 18 -24 months.**

Estimated Cost: CIF, Installation, Project Implementation Management, Site Training & Start-up - From \$14.75million through \$250million.
