Course Description: A five-day (36 hours) training program designed for law enforcement officers who are beginning to work vice investigations or have worked vice for some time. The basic portion of the course will be essential for newer Vice officers and definitely provide veterans with a solid reminder of important principles of working vice and human trafficking investigations. The course will move into advanced techniques and audio/video surveillance techniques that are rapidly changing with the introduction of new technology. The tactical portion of the classroom instruction will definitely impact all officers and assist them in keeping themselves safe while conducting vice operations. Officers who participate in covert operations are not born with the talents needed to perform effectively and safely in undercover situations. These talents are developed from experience, hard work and training. This program will provide officers with the techniques and survival tactics necessary to develop or compliment their present undercover experience. Many times this can make the difference between success or failure and safety or injury and assist them in staying safe while working undercover operations.
