Restorative Procedures for Dental Implants A One-Day Workshop Module 1

Presented by Baldwin Marchack, DDS, MBA

SUMMARY: This is the first in a series of four modules. In this course, participants will gain proficiency in diagnosis and treatment planning for the single missing anterior or posterior tooth, and will master the restorative steps for single posterior implants and single anterior implants. Restorative decision making and execution will be transformed into a simple and easy process. Participants will also learn how to avoid and manage restorative complications. This one day lecture and hands” on workshop will address all of the above topics and participants will have the opportunity to participate in exercises simulating real life situations for impression making techniques including custom impression copings. Participants will also be fabricating provisional restorations using different methods.

DIAGNOSIS AND TREATMENT PLANNING

- Standard of care
- Options for replacement of a single missing tooth
- Indications and contraindications for dental implants
- Types of Implant Connections

IMPLANT RESTORATIVE PROCEDURES

- Restorative options for single implants
- Cement vs screw retained restorations
- Abutment selection
- Prefabricated stock abutments
- Custom computer designed abutments
- Provisionalization
- Open Tray and Closed Tray Impression techniques
- Simple & Practical Surgical Guides

HANDS-ON WORKSHOP

- Learn proper use of a torque driver
- Attach abutments to implants
- Fabricate single unit provisional restorations
- Make abutment level and implant level impressions

TIMES:

8 a.m. to 8:30 a.m.	Registration & Breakfast
8:30 a.m. to 12 p.m.	Presentation
12 p.m. to 1 p.m.	Lunch
1:00 p.m. to 5 p.m.	Hands-On

CEU’s: 8 credit hours

DATE: Friday, September 8 • **TUITION:** \$595
Early Bird Registration: \$535 (30 days in advance)

COURSE INCLUDES
Breakfast, Lunch, Refreshments, and Course Materials
To Register, call: **813-444-1016**

About the Speaker...

Dr. Baldwin Marchack is a 1971 graduate of the Herman Ostrow School of Dentistry of USC. In 1989 he received his MBA from the Anderson Graduate School of Management at UCLA. Dr. Marchack is a Fellow of the American College of Dentists, a Fellow of the International College of Dentists, and a Fellow of the Pierre Fauchard Academy. He is a member of the Academy of Prosthodontics, the International College of Prosthodontists, the Academy of Osseointegration and the Newport Harbor Academy of Dentistry. He is past-president of the American Prosthodontic Society, past-president of the Pacific Coast Society for Prosthodontics, past-president of the American Academy of Esthetic Dentistry and past-president of the Osseointegration Study Club of Southern California. Dr. Marchack is an Honorary Member of the American College of Prosthodontics. He serves on the Board of Councilors at the Herman Ostrow School of Dentistry of USC, and is Adjunct Assistant Professor at Georgia Regents University, School of Dentistry. Dr. Marchack is currently the Chair of the Editorial Council for the Journal of Prosthetic Dentistry, and he maintains a private practice in Pasadena, California.

The Center for Advanced Education in Dentistry is designated as an Approved PACE Program Provider by the Academy of General Dentistry. The formal continuing education programs of this program provider are accepted by AGD for Fellowship, Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. The current term of approval extends from 5/1/2015 to 4/30/2018. Provid

Principles, Procedures, and Protocols of Restorative Implant Dentistry A Two-Day Workshop

Module 2

Presented by Baldwin Marchack, DDS, MBA

SUMMARY: In this course, participants will gain confidence and proficiency in restoring any type of implant connection. Both internal and external connections will be discussed, and advantages and disadvantages of the various types of connections will be analyzed. Participants will also learn when certain connections are indicated or preferred and how to participate in the decision making process with the oral surgeon or periodontist. The management of implants from single units to multiple units in the partially edentulous arch will be discussed.

On day one, the lectures will address different types of implant connections and restorative options for these various connections. Also on day one, the hands-on workshop will consist of exercises to allow participants to recognize the difference between all types of implant connections and become familiar with restorative procedures such as impression-taking, fabrication of provisional restorations and fastening of definitive abutments and final restorations to these different connections.

On day two, the lectures will focus on treatment planning for multiple implants for the partially edentulous arch. The rationale for deciding whether to splint multiple implants or whether to keep them individual will be discussed. Different options for splinting will be presented. The hands-on workshop on day two will include accurate impression-making techniques for multiple implants, and fabricating provisional restorations for multiple implants using different techniques.

DIAGNOSIS AND TREATMENT PLANNING

- Standard of care
- Indications and contraindications for dental implants
- Options for replacement of missing teeth, from single to multiple
- Types of Implant Connections, external & internal, passive & non-passive
- Advantages and disadvantages
- Number of implants required to replace multiple missing teeth

IMPLANT RESTORATIVE PROCEDURES

- Cement vs screw retained restorations
- Abutment selection – engaging vs non-engaging
- Prefabricated stock abutments, multi-unit abutments
- Custom computer designed abutments and frameworks
- Splinted vs individual restorations
- Splinting at implant level, abutment level and restoration level
- Angulated screw channels
- Provisionalization options
- Accurate Impression techniques for multiple implants
- Material selection
- Surgical Guides

HANDS-ON WORKSHOP

- Learn proper use of a torque driver
- Attach abutments to different types of implant connections
- Fabricate single unit provisional restorations for different types of connections
- Fabricate splinted provisional restorations for multiple implant units

DATE: Friday & Saturday, October 6 & 7

TUITION: \$1195

Early Bird Registration: \$1075 (30 days in advance)

COURSE INCLUDES

Breakfast, lunch, refreshments, and course materials

To register, call **813-444-1016**

TIMES: DAY 1

8:00 to 8:30 Registration & Breakfast
8:30 to 10:00 Lecture
10:00 to 10:30 Break
10:30 to 12:00 Lecture
12:00 to 1:00 Lunch
1:30 to 3:00 Hands-on
3:00 to 3:30 Break
3:30 to 5:00 Hands-on

DAY 2

8:00 to 8:30 Breakfast
8:30 to 10:00 Lecture
10:00 to 10:30 Break
10:30 to 12:00 Lecture
12:00 to 1:00 Lunch
1:30 to 3:00 Hands-on
3:00 to 3:30 Break
3:30 to 5:00 Hands-on

CEU's: 12 credit hours

MODULE 2: This session is intended for clinicians who already have some knowledge of implant dentistry.

This is the second in a series of four modules of Restorative Implant Dentistry.
For more information on the additional modules in this series, check out the "programs page" of the website: www.marchackeducation.com.

Module 3 ~ A One-Day Workshop ~ Saturday, October 28

Removable Implant Supported Solutions for Edentulous Arches

Module 4 ~ A Two-Day Workshop ~ Friday & Saturday, November 10 & 11

Fixed Implant Supported Solutions For Fully Edentulous Arches

ADA CERP® Continuing Education
Recognition Program
