INTRODUCTION

Being a professional colourists is a skill rather than a trade. It needs training, dedication and practice. However once you have conquered the skill, it opens up a whole new world of opportunities for profit, uniqueness amongst competitors, and a whole new customer base of clients. This is on top of the advantages to you as a professional carpet and upholstery textile technician. Some specialists are unaware of carpet cleaning and would not be involved in that side of the industry at all. But as professionals in the industry already you are equipped to take full advantage of this newly growing and lucrative skill along with the opportunity it brings.

Knowledge of colour is a great advantage to any specialist textile technician in so many ways. It will guide you to recognise colour loss from colour added situations and much more.

This manual will be a great reference guide for the skilled colourist and the novice alike, it will offer a greater knowledge of all things colour, upholstery, drapery, carpet and rug related. It is a science currently only being exploited by a few and the market and opportunities for this service are massive.

The page numbers shown are approximate as only half is currently written. The expected pages are around 200 (A4 size). It will include many hands on photographs and pictorial guides to illustrate step by step the techniques and possibilities that this skill and knowledge offers you.

We hope you will enjoy and benefit from this valuable new reference manual for the industry as a whole. It will be fully completed during 2017.
