Santa Rosa County Land Development Code Comparison

History

In 1985 Florida enacted the Local Government Comprehensive Planning and Land Development Regulations Act. The act required that all local government adopt, implement and maintain land use plans and development regulations and comprehensive plans and that the land use plans and development regulations be consistent with the comprehensive plan.

In 1985 Santa Rosa County hired Baskerville-Donovan Engineers, Inc. to help implement Zoning along the Gulf Breeze Peninsula. After an almost year long process, in June 1986 the first Zoning Ordinance was adopted. It was decided to zone the county in pieces to make the process easier. The rest of the zoning process was accomplished in house with the Planning Director, a Zoning Administrator, Graphics Technician, and Office Assistant. The dates and areas are shown in the table below.

Area	Date (Month and Year)
Avalon and Garcon Point	July 1987
Holley	January 1988
Bagdad Galt City	August 1988
East Milton and Harold	February 1989
Pace Pea Ridge	February 1990
North End	February 1991

After the entire county had been zoned the Board of County Commissioners hired Jack Dorman & Associates to combine several ordinances, Zoning and Subdivision among them into a Land Development Code. In August 1991 the Land Development Code was adopted in the format that we know today. It has been added to and revised many times over the past 29 years and is a living document, but it has always been clumsy and does not flow well.

What started out in early 2019 as a minor revision of the current Land Development Code soon became a total repeal and replace. In late 2018 the Planning Director addressed the Board of County Commissioners about making some amendments to the Land Development Code that would update it and make some minor changes, and as the citizens would appear at the Board of County Commissioners meetings with land development issues, the Board of County Commissioners would add it to the list of

changes until it became easier to rewrite the Land Development Code than to just fix the current code.

Process

Meetings were held with various stakeholders groups, a web page was set up to solicit comments and suggestions. Land Development codes from around the state were reviewed including the Land Development Codes of the counties to our immediate east and west. We also looked at other Land Development Codes for content layout and design. All comments were entered into a database. For each comment, staff reviewed the comment for consistency, enforceability, legality, etc.. This matrix is included with the first draft that is available online.

Once the layout was chosen we started relocating the existing Land Development Code into the new format and making the changes. This occurred in December 2019 through February 2020.

Proposed New Land Development Code

The below is a synopsis of the Chapters of the proposed Land Development Code, for specifics about where each section in the current Land Development Code has been relocated to please see the table at the end of the document. While the synopsis below does not detail every change, significant changes are noted. For a more comprehensive list of the changes see the matrix included with the LDC draft.

For the purpose of clarity all references to Articles relate to the existing Land Development Code and references to Chapters relate to the proposed Land Development Code.

Chapter 1 General Provisions

Chapter 1 is setting up the rest of the Land Development Code with the legal statements, consistency with the Comprehensive Plan, division of land, purpose of residential, commercial and industrial districts and definitions. As you can see from the attached tables we have several sections that are now housed in Chapter 1 that were in various articles. The 2 main ones are the definitions which were Article 3 and the purpose of residential, commercial and industrial zones which were in Article 6. Within the definitions there were clarifications and additions. Some of the clarifications were to the definitions of accessory structure, lot types, yard. We added many new definitions, examples are as follows: tiny homes, vehicle use area, and silviculture.

Chapter 2 Zoning Districts and Uses

Chapter 2 describes our zoning districts, the allowed uses, special exceptions, conditional uses, setbacks, lot widths, lot size, building height and any yard modifications. The major departure for this Chapter is the fact that we are using tables instead of text. We realize this is a significant change, but it makes a huge difference if you are trying to compare the different zoning categories for a given use. The tables are all organized the same way: residential zones; commercial, industrial and marina; planned developments and public. This Chapter gets its information from Article 6 and Article 2. A couple of major things within R1 and R1M if you are platting you can reduce the lot width to 50 feet however no variances can be requested on those lots we also tried to clarify uses throughout the zoning categories.

Chapter 3 Floodplain Management and Resource Protection

Chapter 3 incorporates the Floodplain Management, Coastal Management, Stormwater Management, Wetland Protection and Resource Protection. With this Chapter we tried to keep all of the environmental elements together starting with the Floodplain Management section which used to reside in Article 10. Next a section was added on wetland protection that was requested by the citizens and added some consistency with our comprehensive plan. Stormwater management was taken from Article 4 while the Coastal Management and Resource Protection was Article 12 and some of Article 7. There was some modifications made in the stormwater management section and the resource management section.

Chapter 4 Design and Development Standards

Chapter 4 is the largest of the chapters, it houses the subdivision standards, site plan criteria, parking requirements, landscaping, alcohol licensing, signs, land clearing and access management standards. The subdivision standards did not move, they are still located at 4.03.00. The commercial and residential performance standards are before the subdivision standards, parts of Article 6 are in this area, along with 4.04.00, parking, landscaping and alcohol licensing requirements moved from Article 7 and signage moved from Article 8. We reduced the size of the heritage tree from 60" to 36" to align more with our neighboring counties and cities (City of Pensacola, City of Milton, Escambia County, Okaloosa County and Walton County) as well as working with environmental agencies, citizens and developers.

Chapter 5 Standards for Special Situations

In Chapter 5 we placed accessory structures, temporary structures, wind energy structures, telecommunications towers, special exceptions and conditional uses. The accessory uses comes from Articles 2, 4, 6 and 7; and temporary uses comes from Article 6. Wind Energy systems and telecommunication towers are currently located in Article 7, while special exceptions are located in Article 2 and conditional uses in Article 6.

Chapter 6 Concurrency Management and Infrastructure Improvements Requirements

Chapter 6 was Article 5.

Chapter 7 Special Overlay Districts

Chapter 7 is a chapter dedicated to the special overlay districts scattered throughout the county. In the current Land Development Code the overlay districts are located with the zoning districts. With the rewrite we decided to pull them out and dedicate a whole chapter to them, plus add in the overlay districts that the Comprehensive Plan has adopted but are currently not reflected in the Land Development Code. We did this in an effort to maintain consistency.

The Bagdad Historic Overlay and East Milton Wellfield Protection Zone were existing in the current Land Development Code. The Rural Protection Zone, Navarre Beach Commercial Core, Garcon Point Protection Zone, and Rosemary Sound Overlay exist in the Comprehensive Plan so in an effort to be consistent we added them to the overlay chapter.

Chapter 8 Airport Environs

We relocated Article 11 to Chapter 8, in it's entirety.

Chapter 9 Variation from Code Requirements

In Chapter 9 we left the first part from Article 9 for the most part alone, then we added modifications that were in Article 2 to Chapter 9 and we added variances that were in Article 2 to Chapter 9. We also added some additional language to the variance requirements that may make it easier for special circumstances to be granted.

Chapter 10 Decision Making and Administrative Bodies

Chapter 10 sets up the by laws for the Zoning Board and the Bagdad Architectural Advisory Board. Some of this is new, some is from Article 2.

Chapter 11 Application, Review and Decision Making Procedures

Chapter 11 sets up the application, requirements, review timelines, withdrawal requirements, for all Planning and Zoning Applications. If Planning and Zoning had an application the requirements were taken and codified.

Major/Minor Land Clearing Permit: Clarification and Examples

A major land clearing permit is not required when:

1. Agriculture or silviculture activity in an agriculture zoning district not required to obtain a NPDES (National Pollution Discharge Elimination System) Permit for the activity being done.
2. Property maintenance activity such as bush hogging, mowing or tree trimming.

Example: A vacant parcel that has some overgrowth and a person is bush hogging to cut the underbrush

A vacant parcel is a little overgrown and needs to be mowed.

A vacant parcel has some trees that needs to have some branches trimmed.

3. All parcels for which a single family residence has been built, or for which a permit has been obtained, and is active.

Example: A person has 5 acres where they live and wants to replace a fence row and there are trees grown up in the fence row and they want to clean up the fence row before they put new fencing up.

A person has 7 acres where they have their home and 1 acre is cleared around the house. They want to clear an additional acre for a garden.

A person has 15 acres where they have their home and they have 1.5 acres currently cleared. They are building a barn and adding cows and a horse so they will be clearing the remaining acreage. They are zoned AG-RR but do not have the Agriculture designation by the property appraisers yet.

A person has a 1 acre parcel and they have obtained a building permit to build a house.

A person has a ¼ acre lot and they want to put a mobile home on the lot and have obtained a building permit to place a mobile home on the property.

A person has 10 acres and they have obtained a building permit to build a house on the land.

4. All parcels for which an approved development order has been obtained.

Example: A new 25,000 square foot strip center has been reviewed and approved by the applicable agencies and a Development Order has been issued.

The construction plans for a 150 lot subdivision has been approved by the Board of County Commissioners.

The plans for a 300 unit apartment complex has been approved by the applicable agencies and a development order has been issued.

A minor land clearing permit is not required for the following:

1. Agriculture or silviculture activity in an AG-RR, AG-1 or AG2 zoning district that has an Agriculture or Silviculture designation by the Property Appraiser

Example: Farmer clearing a field for a pasture and the property appraiser has designated the property as agriculture and it is zoned AG-RR

A person clearing to plant peanuts or soy beans and the property is zoned AG-RR and the property appraiser has the property designated as agriculture

A person has timbered the property and is preparing to replant the property in trees, the property is zoned AG2 and the property appraiser has it designated as Silviculture.

2. Lots or Parcels of land where a building permit for a single family residence, mobile home or duplex permit has been issued.

Example: A person has a 1 acre parcel and they have obtained a building permit to build a house.

A person has a $\frac{1}{4}$ acre lot and they want to put a mobile home on the lot and have obtained a building permit to place a mobile home on the property.

A person has 10 acres and they have obtained a building permit to build a house on the land.

3. Property maintenance activity such as bush hogging, mowing or tree trimming.

Example: A vacant parcel that has some overgrowth and a person is bush hogging to cut the underbrush

A vacant parcel is a little overgrown and needs to be mowed.

A vacant parcel has some trees that needs to have some branches trimmed.

4. Property with a single family residence, mobile home or duplex in existence.

Example: A person has 5 acres where they live and wants to replace a fence row and there are trees grown up in the fence row and they want to clean up the fence row before they put new fencing up.

A person has 7 acres where they have their home and 1 acre is cleared around the house. They want to clear an additional acre for a garden.

A person has 15 acres where they have their home and they have 1.5 acres currently cleared. They are building a barn and adding cows and a horse so they will be clearing the remaining acreage. They are zoned AG-RR but do not have the Agriculture designation by the property appraisers yet.
