PHOY WATTEYS!

PROVIDED!

LEGEND SAYS A **CURSE!** HAS BEEN BESTOWED UPON LAKE MUSCONETCONG!

THE CURSE OF THE INVASIVE SPECIES, THE WATER CHESTNUT!

We must unite as a community to fight against this vile presence which threatens our human and animal health, drinking water quality, fish & wildlife habitats, commercial and sport fishing, and irrigation ability

Be brave and lend yer helping hand! Join our crew of environmentally active pirates as we use kayaks and canoes to remove this plant from the lake! Experience not necessary! Open to all above 16 years of age!

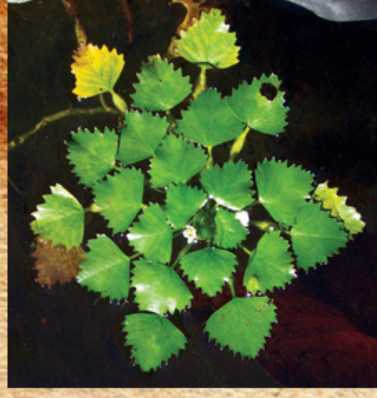

Date: July 15th ! Rain Date: July 16th !

Time: 10am – 2pm

Location: Meetup at Port Morris Park

23 Washington Street, Landing, NJ 07850

A Macrophyte Study found isolated patches of Water Chestnut on the Lake in 2008, and after one year, 30% of the lake was covered. Help us treat this infestation! Bring your own boats and life vests if you can as well as reusable water bottles and sunscreen! Thanks for your support!
