

## **Project Engineer - Water / Wastewater**

HFC is seeking a licensed professional engineer in the State of Iowa to work in our Water / Wastewater division. The ideal candidate will possess, at minimum, a B.S. degree in Civil Engineering and five (5) or more years of experience with water/wastewater related experience. The candidate must be proficient in AutoCAD Civil 3D; EaglePoint experience is a plus. A valid Iowa driver's license is required.

This position requires an individual who possesses strong communication skills (with co-workers, clients, contractors, reporting agencies, general public), who is highly self-motivated, detail-oriented, and organized, and works well in a team environment. This individual must demonstrate strong leadership skills, excel at multitasking and be able to meet deadlines.

In this position, you will be working on all aspects of water/wastewater projects including planning, cost estimating, design, plan preparation, and construction administration duties such as shop drawing review and onsite observation.
