

Kansas Coalition of Public Retirees

KPERS BENEFIT IMPACT

The National Institute on Retirement Security regularly releases studies regarding pensions. Their January 2021 release was entitled, "Measuring the Economic Impact of DB Pension Expenditures". KPERS is a DB (Defined Benefit) pension. The study highlighted several outcomes of interest.

"Retired Americans with a pension receive a stable income every month—even during a recession, which means they can continue spending at the same level as they did prerecession. The same cannot be said for retirees relying heavily on savings for retirement income. These retirees may be fearful to spend their 401(k) savings during an economic downturn, a time when U.S. businesses are already struggling. Thus, pensions can serve as economic stabilizers, similar to Social Security and unemployment insurance."

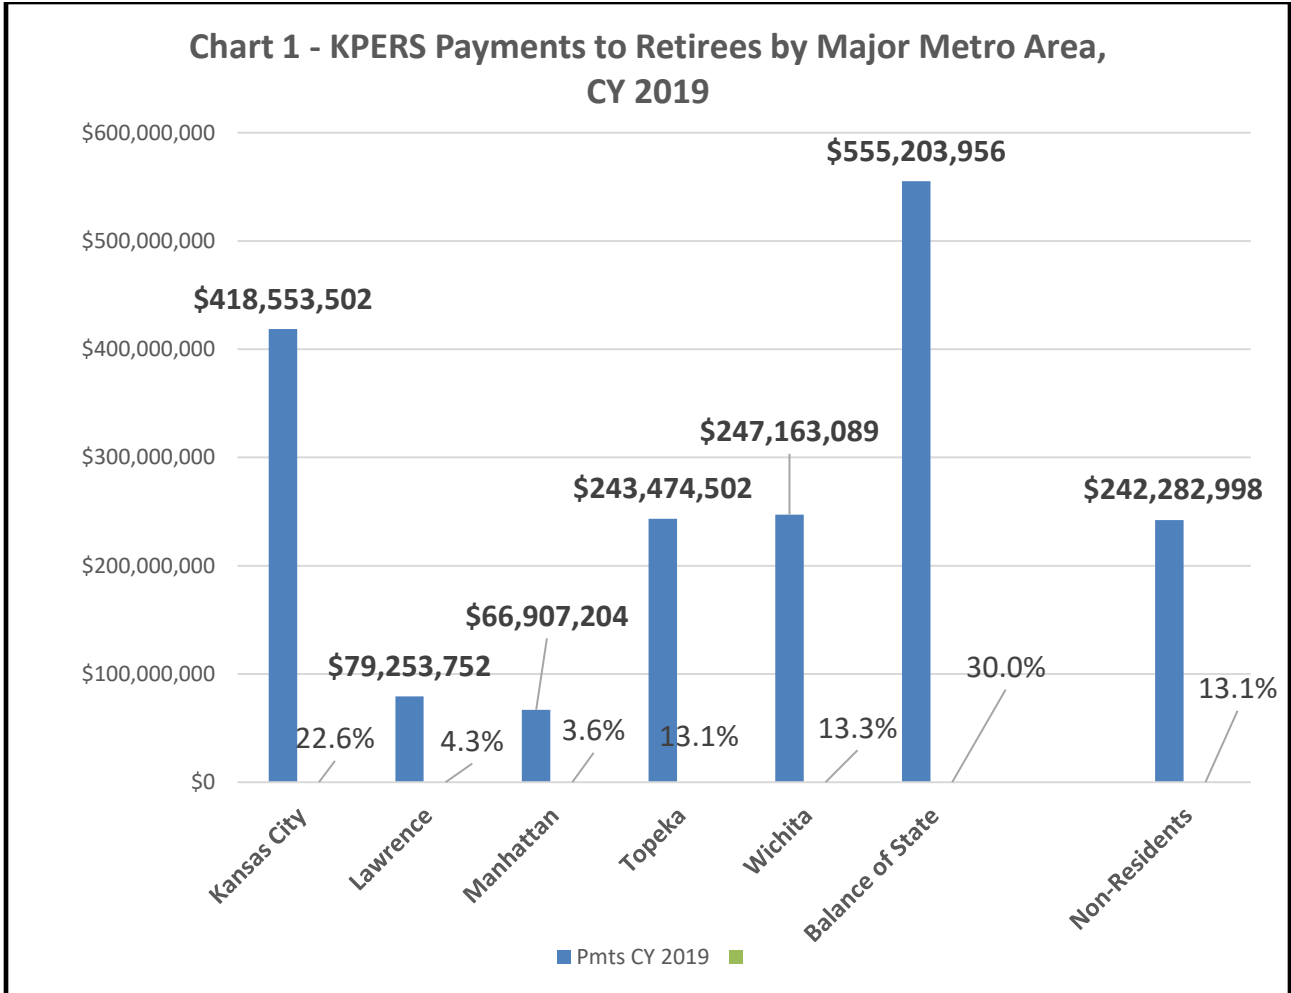

"Given the economic stress facing state and local governments, it's all the more important to understand the tax revenue generated from pension spending. This tax revenue comes from . . . taxes from expenditures in the local economy, like sales tax on retail purchases. This is a stable source of revenue for governments, which will be increasingly important this year," the NIRS Executive Director Dan Doonan explained.

Kansas Information supplied by KPERS lists the annual benefit outlays to retirees in each Kansas County. These payments have a huge direct impact in each of the local 105 Kansas counties. Moreover, these payments also have a multiplier effect providing growth and development within the local economy. While KPERS benefits are paid directly to the retiree, such spending stimulates economic growth and contributes favorably to the local economy, the quality of life and income to the county and the State of Kansas. A healthy KPERS program benefits all Kansans!

Interestingly enough, about 57% of all KPERS payments are made to residents of the five largest Kansas metropolitan areas (19 Counties) while 30% are made to "**Balance of State**" residents (those residing in the remaining 86 smaller counties). KPERS payments to non-residents represent about 13% of total payments. Payments to non-residents remains relatively stable over the years. A graphical representation of KPERS payments is attached. Payments for each county may be found at the KCPR website at ksretirees.org.
