Farmstead Weed Control

Franklin County Noxious Weed Control Board recognizes agricultural producers are concerned about noxious and nuisance weeds spreading via farming equipment and vehicles. FCWB shares that concern as well. High traffic areas such as farm roads and gravel yards are a hotbed for weed seeds. As a public service to farmers FCWB is providing this handout as an informational guide in the management of noxious and nuisance weeds of concern.

The information that follows contains pre-emerge herbicide mixes that have demonstrated good results in the management of puncturevine, sandbur, kochia, and Russian thistle on farm roads and gravel yards where bare ground is desired.

****Pre-emerge Mixes (Need moisture to incorporate)**

12 oz/acre Panoramic 2sl (Plateau)

2.5 oz acre Chaparral/Opensight (**Do not use around arborvitae, juniper or spruce trees**)

1 quart/acre Glyphosate (if weeds are present)

2 quarts/ 100 gal water Bronc Max

1 gal Pendulum Aquacap (Prowl) or 2 lbs/acre Prodiamine 65 WG (**Safe around trees**)

12 oz/acre Panoramic 2sl (Plateau)

1 quart/acre Glyphosate (if weeds are present)

2 quarts/ 100 gal water Bronc Max

****Always follow label instructions, the label is the law.**

Contact FCWB if you have any questions.
