6th Annual

South Texas Heritage Sale

An Opportunity to Build your Herd with Functional Santa Gertrudis and Star5 Females

Welcome to the South Texas Heritage Sale.

We are pleased to offer a fine set of cattle from breeders near and far. The selection of cattle offered this year comes from both established breeders and quickly up-and-coming cattle operations. Some consignments this year come from breeders who started here with us and have now come full circle to offer cattle from initial Heritage Sale purchases. That's really what it's all about. When a new breeder has the confidence and foresight to bet on Santa Gertrudis and its family, everybody wins!

We would like to thank all our consignors for their continued support in our Heritage Sale journey. Functional, quality Santa Gertrudis and Star 5 Santa Gertrudis cattle is what the Heritage Sale has hung its hat on since the beginning. This year, our consignors have come through again in fine fashion, offering their very best. The 2019 South Texas Heritage Sale has something for everybody: donor cow prospects, bred heifers, three in ones and young open heifers. Cattle will be available for viewing on Friday evening and Saturday morning. Please make plans to join us at Fermin's Mexican Restaurant in Robstown, Texas, for a Dutch treat dinner and a good time. On Saturday before the sale commences, enjoy a traditional Mexican lunch compliments of the South Texas Santa Gertrudis Association and the South Texas Junior Santa Gertrudis Association. Our Junior breeders will compete in our annual Hot Gert Show on Sunday so we encourage you to stay and support our junior members in agriculture as they compete for belt buckles and braggin' rights, all at the same location, Richard Borchard Fairgrounds.

The South Texas Heritage Sale is sure to appeal and please anyone interested in Santa Gertrudis cattle. From the registered cattle producer to the commercial cattleman, we have something for everybody. Don't pass up the chance to take home part of what has become a South Texas tradition in the Santa Gertrudis breed. Join us for a weekend of fine cattle, friends and fellowship.

Sincerely,

The South Texas Heritage Sale Committee

Larry Garza, Kathryn Hefte, Kade Thigpen, Yancey Strait, Adolfo Sanchez, Felix Serna, Taylor Schuster, Kenneth Tom Hefte, Wade Ruddock, and Melanie Brewer

Friday, **22nd**
November

4pm – View cattle
7pm – Dutch Treat Dinner at Fermin's Mexican Restaurant, Robstown, TX

Saturday, **23rd**
November

8am – View cattle, coffee and doughnuts
11am – Traditional Mexican Lunch
Noon – South Texas Heritage Sale
Cattle can be loaded out following the sale
4pm - Hot Gert Open Show

Sunday, **24th**
November

9am – STJSGA Annual Hot Gert Show
Noon – Sale cattle must be off fairgrounds

Location

Special thanks to auctioneer:

Leo Casas, III

Data Definitions

SGBI Expected Progeny Differences

Expected Progeny Differences, EPDs, are the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the SGBI database. EPDs are expressed in units of measure (plus or minus) for each trait being evaluated and are calculated utilizing pedigree and performance information. SGBI is a leader in the adoption and implementation of cutting-edge genetic technology. In 2013, SGBI released the first genomic-enhanced expected progeny differences (DNA verified) for Bos indicus-influenced cattle. The inclusion of DNA into the breed's EPD calculations (GE-EPDs) has resulted in information that is more accurate and predictable than a pedigree and performance prediction alone. Currently, the association's database contains more than 8,000 performance verifying DNA samples. In addition, to being the first Bos indicus-influenced breed to offer GE-EPDs, SGBI was the first beef breed to implement single-step methodology for the incorporation of genetic information into the genetic evaluation. This approach maximizes use of data reported on all animals throughout the pedigree and greatly improves the EPD accuracy.

SGBI Indices

SGBI offers two selection indices for commercial cattleman use. Indices are multi-trait selection tools designed to assist commercial producers by adding simplicity to genetic selection decisions. Indices provide an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and the calves were exposed to the same environment. SGBI's indices provide performance insight to producers marketing yearlings by the pound (\$ Growth) or retaining ownership through the feedyard (Carcass Rank).

\$ Growth Index - The growth index puts together weaning weight and yearling weight. Since WW is contained in YW, post-wean gain (PWG) is used in the index to prevent double counting WW. As an example of the index, if an animal has a +30-growth index, its offspring will be on average worth \$30 more as a yearling than the breed average, based strictly on weight. Please note, the \$ Growth index puts zero economic weight on maternal traits and utilizing the index as a replacement female selection tool might result in larger mature weight cows.

Carcass Rank - The carcass rank index contains marbling score, hot carcass weight, ribeye area, backfat and tenderness, and is weighted by the economics of carcass values. It is expressed as a numerical ranking within the breed from 1 to 10, with 10 being the highest. For example, an animal with a score of 9 would be in the 80th percentile or would be better than 80% of the population in carcass composition. A ranking of 6 would place the animal in the 50th percentile. Carcass Rank Index places strong emphasis on growth and carcass traits. Utilizing Carcass Rank as a seedstock selection tool might result in increased growth while negatively impacting marbling. Seedstock producers focused on improved carcass quality are encouraged to utilize SGBI's Marbling EPD in the decision-making process. Breeding cattle with higher marbling EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades.

Terms and Conditions

Terms: The terms of the sale are cash or check, payable at sale location.

Herd Health: If not from accredited herds, heifers will have brucellosis vaccination or clean test.

Purchaser's Risk: Each animal becomes the risk of the purchaser as sold. Animals will be care for at the purchaser's risk for reasonable length of time.

Breeder's Guarantee: No guarantee is given that a pregnant female will deliver a live calf or that she will carry a calf full term. Bulls sell with satisfactory semen test within 30 days of sale.

Accidents: Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, Auctioneer nor seller assumes any responsibility in this manner and disclaims any liability, legal or otherwise in the event of accident or loss of property.

Liability: The Sales Management and/or Auctioneer has been employed by the consignors of the animals being sold solely for the purpose of advertising and conducting the subject sale. All information regarding the subject animals as published in the sale brochure and as announced in the sale is based on representation made to the Sales/Management/Auctioneer have not made any independent investigation to verify the title, health, registration and lien status of the subject animals; and the Sales Management and/or Auctioneer make no representations, either expressed or implied, as to whether or not the subject animals are security under any lien, with legal equitable.

Announcements: Announcements from the auction block will take precedence over the printed material in this catalog. Buyers are therefore cautioned to pay attention to any such announcements.

Red Doc 8204 is a curve bender female sired by the outstanding herd bull at Wendt Ranches Red Doc Never Sank 5012. This heifer has a great curve with a BW of 51 lb. to a YW EPD of 23.11. Sells bred, AI'd to Red Doc El Sueno 8020(#20181434) and cleaned up with Red Doc 8191(#20185575). Red Doc 8249 is one of the most unique lots in the sale, a chance to purchase high marbling genetics. Red Doc 8249 scanned a 6.24 IMF, off wheat pasture and shows elite seedstock, boasting high marbling genetics and out of one of our highest feed efficient cow lines 0321. This female is investment material and will return more value in your calf crop. Sells bred, AI'd to Red Doc Trump's Real Estate 7432(#20174234) and cleaned up with Red Doc 7492(#20176833). Red Doc 8078 is a high performance Red Doc Dinero 4088 daughter with stand out EPDs of WW 22.2, YW 22.4, with actuals of YW 980lbs, IMF 4.2, and REA 10.61. This bred female is a great balance of performance and high carcass genetics. Sells bred, AI'd to Red Doc 7066(#20174183) and cleaned up with Red Doc 8191(#20185575).

Korban Cattle 100 was chosen for this sale specifically because of the quality this female brings to the table. Korban Cattle 100 is the daughter of KR 480/16, purchased by Korban Cattle at the 2018 Houston Super Sale for \$23,000.00, she is sired by KR 322/15. Korban Cattle 100 touts an actual REA of 8.59 and IMF of 5.20. Progressive genetics like these are special and it is for that reason that we have chosen to offer this special female. She sells safe in calf, AI'd to KR921/15 El Rey on 05/03/2019 and covered naturally by KR 729/16 through 6/3/2019.

Red Doc 8424 is a great curve bender bred female and top lot for ribeye area in the breed, while balancing calving ease. Sells bred, AI'd to Red Doc Never Sank 5012 (#20153072) and cleaned up with Red Doc 7492 (#20176833). Red Doc 8310 is a high-performance female out of our top maternal sire C/A 881. This Female can marble, milk, and has the top set of performance EPDs in the Red Doc offerings. Red Doc 8310 is serious maternal machine, with a YW of 952 lb. and backed by EPDs of WW 25.22 and YW 37.54. Sells bred, AI'd to Red Doc Never Sank 5012 (#20153072) and cleaned up with Red Doc 7492 (#20176833). Red Doc 8253 is another rare opportunity to tap into the Red Doc carcass bank. Red Doc 8253 is out of the Red Doc Carcass King 3150 and her heifer sibling sold ½ interest in the Houston Super Sale 2019 for \$25,000. This line is known for their high carcass easy fleshing traits. Sells bred, AI'd Red Doc En Vivo 8343 (#20185488) and cleaned up with Red Doc 7492 (#20176833).

Two super good bred heifers sired by SJ Conductor and out of Double G Farms' top females. We feel these heifers are an asset to any cowherd, but the prize is in their belly. Both great females sell safe in calf to RDF 6069 (Reg. # 20164161), who's outstanding EPDs are truly an asset to our program. RDF 6069 can significantly improve any herd, with 5 traits in the top 2% of the breed, including weaning weight, marbling and REA in the top 1%.

Three outstanding females all sired by Hefte's A44 and out of top Maldonado females. A44 has helped The Maldonado family in creating the kind of cattle that appeal to the registered cattle producer as well as the commercial cowman. Phenotypically, these females are extremely sound and correct. Maldonado cattle are hearty and able survive in the harshest of conditions, giving a calf every year. Genetically, these heifers boast great EPDs, sired by Hefte's A44. A44 gives these animals the ability to gain weight fast and wean heavy. Genetics like these are a great asset to any program, registered or commercial. These three females sell exposed to MCC Titan 24/7.

BF Samara is an open heifer out of our Wendt son Estaban 213/0 and one of Bayli's show heifers, Carroll Sierra 020. She goes back to Grizzly's Chunk 0525 and Four J bull 03/064. BF Lainey: An open heifer with Grizzly's Chunk 0525, Carroll, El Colina, and Winrock genetics. This big boned heifer would make a good show prospect, as her full sister placed 9th in her class of 40 at the NJSGA 2019 show. SF Olive: This young heifer had an adjusted weaning weight of 609 lb and would make a good show prospect. She has Wendt, Carroll, Grizzly's Chunk 0525, and Five Oaks genetics.

Three outstanding ¾ Santa Gertrudis, ¼ Red Angus half siblings, sired by RDF Never Sank 5012 and out of top KT cattle Co. Red angus/Santa Gertrudis females. All three share great EPDs, with 4 traits in the top 10% respectively, as well the phenotype to put you in winners circle. Something unique in this offering, for the first time ever, Korban Cattle is including 2 semen straws per heifer of KR 1269/14 "Galan"; never has semen from this great herd sire been offered or sold. KR 1269/14 "Galan" boasts 8 traits in the top 5% with his REA and IMF both in the top 2% of the breed. Semen is to be used exclusively on these three heifers. registration cost of \$1500.00 will be assessed should the semen be used for the breeding of any other female. The calves out of these beautiful females and KR 1269/14 "Galan" will be registerable as purebred Santa Gertrudis - a great outcross for any program.

MBL BB's Rattle 619 is a three-quarter blood female that will add productivity, thickness, and femininity to your herd. She puts together phenotype as well as performance. She is sired by Red Doc Rattler 7025 (ET) and out of a first time Maine Anjou (Buck Cattle Co) x Santa Gertrudis dam. Don't pass up the opportunity to put this high performance female to work for you. MBL Witchy Woman 729 is a polled, balanced female with loads of thickness. This high performing half-blood female is sired by a Brangus bull and out of Miss Mardi Gras 732, a 12 year old producing female that never misses. Great opportunity to add this polled, high performing female to your herd.
