CONCUSSION WAIVER & INFORMATION:

A concussion is a brain injury, and all brain injuries are serious. They are caused by a bump, blow, or jolt to the head, or by a blow to another part of the body with the force transmitted to the head. They can range from mild to severe and can disrupt the way the brain normally works. Even though most concussions are mild, all concussions are potentially serious and may result in complications including prolonged brain damage and death if not recognized and managed properly. In other words, even a 'ding' or a bump on the head can be serious. You can't see a concussion, and most sports concussions occur without loss of consciousness. Signs and symptoms of concussion may show up right after the injury or can take hours or days to fully appear.

West Coast Striders Track Club policy in response to a suspected concussion adheres to strict guideline that any athlete who is suspected of sustaining a concussion or head injury in a practice or competition shall be removed at that time for the remainder of the day. No athlete may return to activity after an apparent head injury or concussion, regardless of how mild it seems or how quickly symptoms clear, without medical clearance by a licensed healthcare professional.

If you or your child reports any symptoms of concussion, or if you notice the symptoms or signs of concussion yourself, seek medical attention right away.

Symptoms may include one or more of the following:

- Headaches
- 'Pressure in head'
- Nausea or vomiting
- Neck pain
- Balance problems or dizziness
- Blurred, double, or fuzzy vision
- Sensitivity to light or noise
- Feeling sluggish or slowed down
- Feeling foggy or groggy
- Drowsiness
- Change in sleep patterns
- Amnesia
- 'Don't feel right'
- Fatigue or low energy
- Sadness
- Nervousness or anxiety
- Irritability
- More emotional
- Confusion
- Concentration or memory problems
- Repeating the same question/comment
- Loses consciousness

CONCUSSION WAIVER & INFORMATION CONTINUED:

Slurs speech
Experience seizures or convulsions
Displays clumsily or uncoordinated movements

Continuing to participate with the signs and symptoms of a concussion leaves athletes especially vulnerable to greater injury. There is an increased risk of significant damage from a concussion for a period of time after that concussion occurs, particularly if the athlete suffers another concussion before completely recovering from the first one. This can lead to prolonged recovery, or even to severe brain swelling (second impact syndrome), with devastating and even fatal consequences. It is well known that adolescent or teenage athlete will often under-report symptoms of injuries. Concussions are no different. As a result, education of administrators, coaches, parents and students is the key for student-athlete's safety.

By signing below, I confirm that I have read the Concussion Waiver.
