The following narrative provides details regarding Expert Witness services that I have provided which are not included on my CV:

Expert Witness Services Provided

Tex-Isle Supply, Inc. vs Alessio Pipe

Client: On Behalf of Tex-Isle Supply, Inc. / Kelley Drye & Warren LLP
Location: USA
Scope: Expert Testimony as End User for Plaintiff
Magnitude: \$1,000,000 (approximate)
Year: 2022

Provide expert testimony as the purchaser and end user of line pipe provided by Tex-Isle Supply, Inc. from Alessio Tube, an Italian pipe mill. The pipe in question failed during hydrostatic testing. Testimony in support of Tex-Isle Supply, Inc. included the technical and regulatory aspects of hydrostatic testing line pipe; purchase order terms & conditions; API 5L specifications of line pipe; the replacement method and related activities of the failed pipe and re-hydrotest of replacement pipe; and associated costs. Case is being heard by the American Arbitration Association.

O-089950: Lucinda Avery and Roy Avery Case

Client: Expert Institute / Carlile Law Firm, LLP
Location: USA
Scope: Expert Services, Testimony and Witness for Plaintiff / Findings Report for Litigation
Magnitude: \$1,000,000 (approximate)
Year: 2020

Provided services as an independent expert in the areas of construction and site construction management, including safety processes and controls for litigation regarding an individual injured at a place of employment while that place of employment was undergoing repair & construction activities.

Case was settled successfully for the Plaintiff.

Confidential Project

Client: The Michel-Shaked Group / Robbins Geller Rudman & Dowd LLP
Location: USA
Scope: Expert Services, Testimony and Witness for Plaintiff / Findings Report for Litigation
Magnitude: \$100,000,000 (approximate)
Year: 2017

Provided services as an independent expert in the areas of project and construction management, including project controls, cost engineering, progress tracking, schedule control, and project reporting for litigation concerning the corporate reporting of a major domestic EPC services contractor. The case was related to alleged SEC reporting violations.

Developed a preliminary Findings assessment to provide an overall understanding of what processes and procedures a prudent EPC services company would take in order to properly manage its major

Greg Lamberson

capital projects, including schedule, cost control, cost engineering, and reporting activities for management to be fully apprised at all times of the status and profitability of its' projects.

My work was in support of the plaintiff in the case. The case was successfully settled prior to any depositions or testimony required of me.

Alpha Crude Connector Project

Client: Frontier Energy Services, LLC / Alpha Crude Connector, LLC (ACC)
Location: USA
Scope: Expert Services / 3rd Party Failure Analysis Report Assessment and Rebuttal
Magnitude: \$500,000 (approximate)
Year: 2016

ACC suffered failure of three pipe segments that failed during hydrostatic testing of several lengths of pipe after welding and having the completed welds inspected. Three separate pipe segments failed, including a segment of pipe API 5L X-52, 8 5/8-in diameter, .188-in thickness; a second segment of API 5L X-52, 8 5/8-in diameter, 0.188-in thickness; and a smaller diameter API 5L X-52, 4 1/2-in diameter, 0.188-in thickness also failed.

The pipe was manufactured by SEAH Steel and were coated with 14-6 mils of green 3M 6233P protective coating. The three pipe segments were manufactured employing an Electric Resistance Welding (ERW) process.

The 3rd party expert Failure Analysis Report concluded the failures were due to transit fatigue imparted on the pipe after coating (transportation was provided by ACC). The rebuttal report produced a convincing case that transit fatigue did in fact lead to the failure, however, the transit fatigue occurred during ocean transport rather than the short over land transportation provided by ACC. ACC was successful in the settlement.

Confidential Project

Client: Germer Gertz, LLP
Location: USA
Scope: Expert Services, Testimony and Witness for Defendant / Findings Report for Litigation
Magnitude: \$35,000,000 (approximate)
Year: 2010-2011

Provided services as an independent expert in the areas of project and construction management for litigation regarding a domestic pipeline project.

Developed a Findings Report to provide an overall understanding of what steps an Owner Company would typically be expected to take in order to manage its major capital projects taking into consideration the contracting strategies selected.

A management analysis was provided based on contracting strategies selected for the pipeline engineering and construction work with a focus on what should have happened after the contract type was made, both from a Construction and Project Management standpoint. The litigation was successfully defended against.

International Construction Consulting, LLC
Greg Lamberson

My work was in support of the defendant in the case. I participated in two (2) depositions for the defendant; the case went to trial, but prior to my testimony, the case was dropped (successful for the defendant whom I represented) by the plaintiff.
