

6.5KW Diesel Generator (single phase) Small Trailer Mounted

This 6,500 watt single phase generator is diesel powered and mounted on a small 2 wheel trailer with a 2" hitch for easy towing. It has the convenience of a very low profile so it is easy to hide from view. It is an extremely quiet running unit powered by an economical Kubota diesel engine.

Power distribution to your event will only come from outlets on the front panel of the generator or by a 30 amp Distribution box with 8 Edison (standard) type outlets on it. 25' extension 30 amp cables are available for it.

Optionally 50 amp cables and distribution boxes can be connected to the single phase outlet on the generator.
