

## **Brand Protection**

### **1. Vinyl Backed Tamper Evident Holographic Label**

The Vinyl Backed Tamper Evident Holographic Label starts out life as a standard Hologram Label with a few enhancements. The holographic material is hot-stamped to an extremely fragile Vinyl substrate which is then formed into a label. Any attempt to remove the label from the object that it has been adhered to will most certainly result in the destruction of the label integrity. The vinyl backing is extremely fragile and will without a doubt tear if there is any attempt to remove the label. The torn label would be very obvious to anyone visually checking the label. We can form a custom hologram with your company's logo.
