*We are all living longer and want to enjoy a healthy and care-free lifestyle.*

Here is the 'Bottom Line'. There are only two ways to make money:

- By You working for Your Money (that is exchanging your time and skill for financial consideration) and/or
- By Your Money working for You!

If you keep your money in your back pocket (or under the mattress) instead of investing it, your money doesn't work for you and you will never have more money than what you save. By investing your money, you are getting your money to generate more money by either earning interest and/or capital appreciation by buying and selling assets that increase in value.

It really doesn't matter how you do it. Whether you invest in:

the objective is the same - to generate more cash for you in the future.  
As they say, "Money isn't everything, but happiness alone can't keep out the rain."

Your own 'Why' is important. It is not for the money itself but what it enables you to achieve – your goals and dreams, and the freedom of choice.
