INTERNATIONAL
COURSE OF

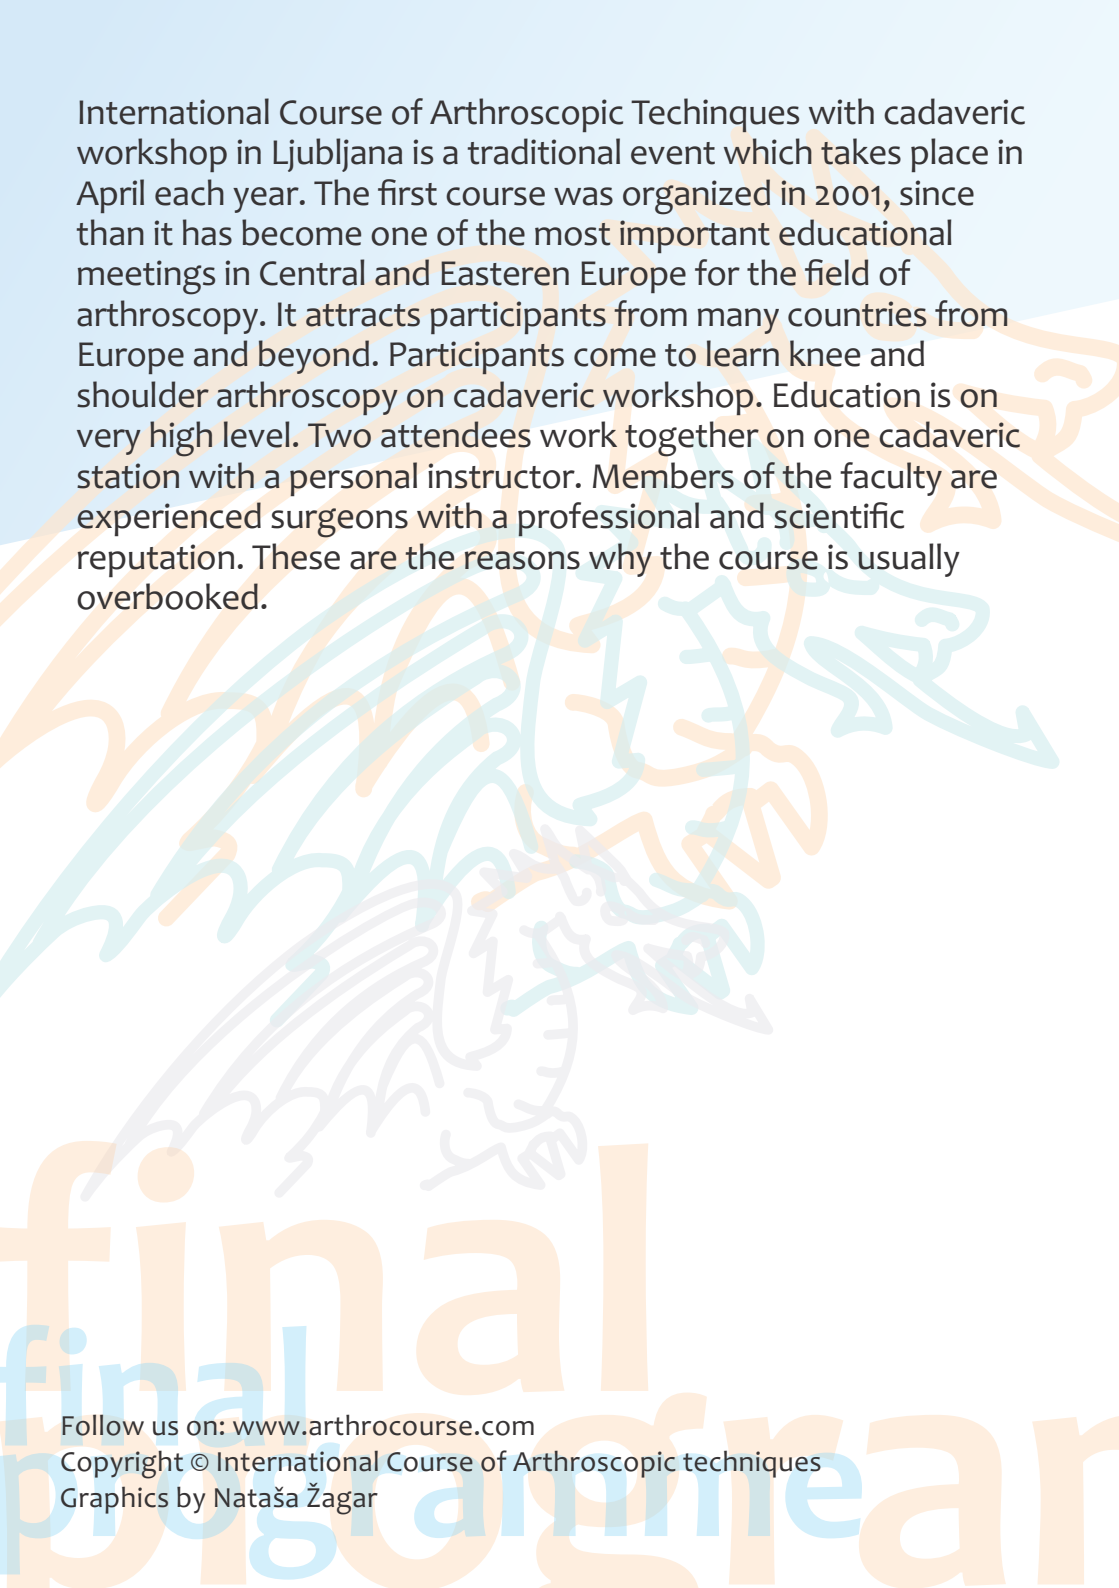

ARTHROSCOPIC TECHNIQUES

WITH
CADAVERIC WORKSHOP

Ljubljana, Slovenia
12th and 13th April 2024

final
programme

International Course of Arthroscopic Techniques with cadaveric workshop in Ljubljana is a traditional event which takes place in April each year. The first course was organized in 2001, since then it has become one of the most important educational meetings in Central and Eastern Europe for the field of arthroscopy. It attracts participants from many countries from Europe and beyond. Participants come to learn knee and shoulder arthroscopy on cadaveric workshop. Education is on very high level. Two attendees work together on one cadaveric station with a personal instructor. Members of the faculty are experienced surgeons with a professional and scientific reputation. These are the reasons why the course is usually overbooked.
