

We appreciate you taking the time to visit the Media section of our website, where you can read our **Press** announcements, find the **Trade Show / Event** we will be at next, peruse our customer **Testimonials**, and check out the many **Awards** we have won since 1989.

Mind the IMS Gap

0

WELCOME ERICSSON

LET APEX MIND YOUR IMS GAP

IMS Application Server | SIP Feature Servers

Cloud Enterprise Services | Class 5 Features | Multi-Media Solutions

The APEX and **Ericsson** relationship started back in the early 1990s when our award-winning [OmniView® Service Creation Environment](#), the core component of our [OmniVox3D® Telecom Application Server](#), was private-labeled (OEM) by **Ericsson** in Sweden to address a specific product gap. Since then, OmniVox3D has helped **Ericsson** fill specific solution gaps at Network Operators around the world and integrated OmniVox3D to the **Ericsson IMS Core**.

A recent **Ericsson**-APEX project was to implement at [MTN](#) Nigeria, the largest Regional Mobile Network Operator in Africa with more than 55 million subscribers, a number of Value Added Services for their Hosted PBX solution built on the Ericsson VPN and targeting SMEs. Services they were interested in originally offering included automated attendant, call hunting, call diversion, music-on-hold, and find me/follow me, with conferencing and outbound services to follow in the future.

Other Network Operators which we teamed up with **Ericsson** include...

<u>Network Operator</u>	<u>Country</u>	<u>APEX IMS Solution</u>
MTN	Nigeria	Automated Attendant
AT&T	USA	Video Conferencing (WebRTC and AD-Hoc)
Iusacell	Mexico	Call Interception
TotalPlay	Mexico	Intelligent 800
