ESS ICE/CDI ORDER FORM

ESS ICE (Interchangeable Component Eyeshield) is a high performance safety eyeshield safety glasses system. ICE includes three 2.4 mm polycarbonate, optically correct lenses. One clear, one amber, and one dark gray for different light conditions. All lenses have an unlimited field of view, anti-scratch and anti-fog coatings. The lenses meet ANSI Z87.1 and MIL-V-43511C standards and also provide 100% UVA and UVB protection. Adjustable temples allow for a comfortable custom fit. A soft case with lens pocket and neck leash is included. Not only for tactical operations the ICE provides superior eye protection for EMS, technical rescue, and other hazardous activities.

The CDI Model is a medium-fit Ballistic Sunglass with interchangeable 2.2 mm high impact polycarbonate lenses in clear and smoke grey. Other key features include 100% UVA and UVB protection, very light weight, virtually indestructible nylon frame, no-slip rubber temples and nose bridge, and smart tension cam-hinge temples for variable fit and durability. The temples are wide for maximum side protection. The lateral exchange system is fast and easy. Rx inserts are available for prescription lenses by Hansen's Eagle Eye with a 24mm unique shooters bifocal in Trivex lenses.

LENSES FOR YOUR ESS RX CARRIER from Hansen's Eagle Eye

The Rx Carrier lenses may be ordered from Hansen's Eagle Eye by simply following the instructions on the order form. We need your prescription including the PD, pupillary distance. The patented "Shooters Bifocal" may also be provided in the upper portion of the aiming eye lens near the nose bridge. This 40mm single bifocal is large enough to be used for providing near sight correction for both pistol and rifle use. Be sure to have your eyes examined at front sight distance away and indicate the desired "add" power for the bifocal on the prescription. The lenses can also be ordered with single vision correction only.
