

# ILLUMINATION “HT” Series

## Ultraviolet Water Disinfection Systems

### ULTRAVIOLET DISINFECTION

The technology uses UV light to target and disable disease causing microorganisms (pathogens). When you expose pathogens to UV light, their reproduction is limited. The UV lamp produces light in the UVC range of the light spectrum. Specifically, light in the 254 nanometer (nm) range is an effective wavelength.

When water pathogens are exposed to UV light, their cells become damaged and this damage inhibits reproduction. The UV light, damages the cell's DNA and RNA and once damaged, they are unable to replicate. This physical process renders them harmless. The amount of damage is a result of the intensity of the UVC output multiplied by the time the water is exposed to the light. The applied dosage is commonly referred to as microwatts and is often expressed as mJ/cm<sup>2</sup>.

### SYSTEM OVERVIEW

Flow Characteristics	
Applications	Disinfection / TOC reduction / Ozone destruction
Flow rate gpm (lpm)	30 (114) [10 (38) TOC, 10 (38) OD]
Dosage	40 mJ (100 mJ TOC, 100 mJ OD)
Vessel Overview	
Vessel	316 L stainless steel
Treatment	Electropolished internal and external
Pressure rating	150 psi (10 bar)
Mounting	Horizontal
Connections	1.5" MNPT
Port	Monitoring and drain port
Lamps	2 x 44 watts
Lamp type	Low pressure high output
Wavelength	254 nm (185 nm TOC)
Lamp life	> 1 year
Compression fitting	Aluminum anodized
Oring	Viton
Head Gasket	EPDM
Removal space lamps	36"
Power Supply Center	
Type	Remote UL Ballast Control
Power	120-277 Volt 50/60 Hz
Ballast type	Electronic
Alarms	Audible/Visual/Count dow lamp timer
Contacts	Dry contact for lamp out
Power supply	24" plug
Options	
Ultraviolet Monitor	Analog or Digital with 4-20 mA
Fittings	Sanitary, Flange, DN Flange
Enclosures	Painted steel, Stainless steel, Explosion proof
Ports	Sampling, drain
Light traps	Custom design
High heat monitoring	Shut off thermistor

IL-HT-200-2  
IL-HT-200-2-TOC  
IL-HT-200-2-OD

#### UV is effective on many

- Bacteria
- Viruses
- Fungi
- Algae
- Protozoa

#### Microorganisms

- Cryptosporidium
- Giardia
- Cholera
- Salmonella
- e-Coli
- Coliform bacteria
- Fecal coliform
