Stonecrest Villas HOA
Ledgestone Court
Fort Mill, SC
29708

Below is a description of the services I recommend for control and prevention of fire ants on the grounds of the Stonecrest Villas Community.

Fire Ant Treatment (Annual):

- Annual application of insecticides to the grounds of the community for control and prevention of fire ant activity.
- Comprehensive inspection with each service to determine hot-spots and frequently active areas where pressure is constant.
- Communication with management of the site as to dates of visits, and locations where fire ants are seen, both before and following treatments.
- Application of granular insecticides, granular baits, dusts, and liquid insecticides depending on populations of Fire Ants with each service. These will be applied with a walk behind spreader, a spray rig, a backpack sprayer, or applied by hand.
- Price each service \$995.00, service frequency every 12 months.

-Spot treatments will be \$95.00 for each service, should the Annual Fire Ant Treatment cycle not be utilized community-wide.

Thank you! Please let us know how you would like to proceed with these services.
