4733 Amber Valley Pkwy S, Ste 104, Fargo, ND 58104 | Ph: 717.585.0393 | www.KeystoneStateTesting.com

In accordance with ISO17025, A2LA, and ASA requirements, Dakota State Testing is committed to providing the highest accuracy, precision and transparency to our customers. Therefore, the Laboratory will only be using NIST or other properly accredited standards in testing. This eliminates any in-house standard development, which is permissible with ISO17025 accreditation, but may preclude opportunities for our customers.

Additionally, with every test result, the Laboratory will be providing all pertinent information to reproduce the test if necessary, including methodology, equipment, any abnormalities, all necessary calculations, and any assumptions made during testing.
