

Dual Shades Need Dual Brackets

Skyline Dual Brackets offer greater flexibility when mounting two shades in one opening to create room darkening and ambient light control. Brackets can be mounted to the ceiling or wall, for added versatility and decorating options around the home or in commercial projects. The use of dual mounting brackets requires less measuring and allows for proper alignment resulting in a better overall installation.

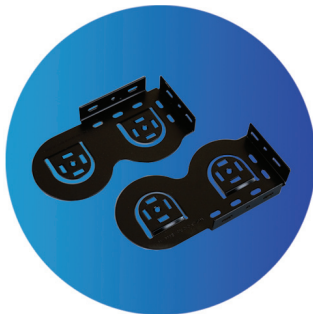

Choose from **Three Styles**

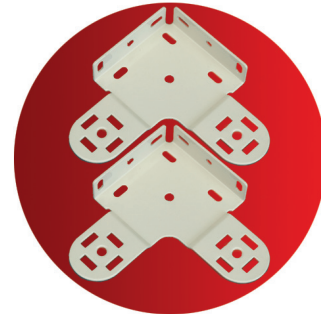

VERTICAL BRACKETS

Vertical Brackets are thin, compact and reliable. Available for right and left mounts, they are great for narrow window frames. Vertical Brackets come in many colors such as Black, White, Vanilla, Cream, Gray and Plated.

HORIZONTAL BRACKETS

Horizontal Brackets are better for heavier shades and wide window frames. Available for right and left mounts, they are perfect for wide window frames. They come in several colors such as Black, White, Vanilla and Plated.

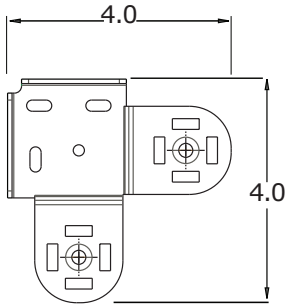

UNIVERSAL BRACKETS

Universal Brackets are ideal for most window frames, as there's no need for a right and left style bracket. They are available in two sizes (38" & 48") with matching covers and intermediate brackets. Choose from five designer colors: Black, White, Vanilla, Cream and Gray.
