**Total Cost via Qantas Freight Express: \$372.50**

**Total Cost via Qantas Freight Priority: \$497.50**

### Procedure

Present your veterinarian with our Semen Request Form, so that he/she may order semen when your mare is ready. Your veterinarian may have an idea of the best shipping method to insure the semen arrives via the most reliable method to their location. Otherwise please contact us to help you choose a suitable freight option. Our office MUST have an emailed copy of the semen request form or we cannot ship the semen. Ideally we would like to have the request at least the day before collection is required, as some of our stallions do not stand on-site. Leaving request until the last minute risks either the stallion not being able to be collected in time, or possibly that he is fully booked for the day. Please note most delivery options are not available on weekends.

All first time clients of Carmyle Veterinary Services must pre-pay the collection costs, or the semen will not be sent. Our office will let you know if your selected stallion requires additional processing for shipment.

Please remember that once the semen leaves Carmyle Veterinary Services, we hold no responsibility for its delivery. The freight services above are not guaranteed by the couriers (with exception of Qantas Freight Priority- but we still cannot guarantee full refund of any veterinary related fees). Therefore we cannot receive refunds for parcels that do not arrive on time, so we cannot offer this to our clients. Please phone 0407564623 with any questions.
