

and Care and Maintenance

We recommend using products such as IMAR Strataglass Protective Polish, IMAR Strataglass Protective Cleaner, 210 Cleaner & Polish and mild soap. Use of harsh cleaners like *Simple Green* and/or *pine* will dull the curtains quickly.

Warning

* Use of **RAINEX** on Strataglass or O'Sea appears to work for a short time but then dulls the surface and presents an "Orange Peel" effect. Do not use **RAINEX**.

* Use of cleaners, polishes, scratch removers, or any other product made for regular, uncoated vinyl will damage your glass. Do not use these products

* **DO NOT HANDLE WITH SUNSCREEN ON YOUR HANDS!** This will permanently cloud the vinyl where handled.

General Maintenance

We recommend using IMAR Strataglass protective Polish every 1 to 2 months. In the interim, use IMAR Strataglass Protective Cleaner frequently.

Note: All new vinyl can easily get impressions in itself. We recommend new enclosures be left in place to the extent possible. If completely removed, enclosures must be interleaved with either acid-free paper (available from framing shops) or old sheets (the best choice) to prevent "pooling" in the glass, vinyl "seasons" over time and becomes less impressionable. Roll all curtains down and fasten in place nightly to keep perfect appearance.

Cleaning: Flush thoroughly to cool the surface and rinse away environmental abrasives. Wash with gentle and high quality soap. Do not use Simple Green, or pine or any other harsh cleaner - they will dull the surface. Apply the soapy water to the clear vinyl section of the curtain with special purpose washing mitt or soft cotton cloths. Thoroughly rinse the soapy solution with fresh water and completely dry the curtains with a high quality chamois. Your clear vinyl curtains should be washed whenever your boat is washed. After washing the curtains, apply IMAR Strataglass Protective Polish or 210 Cleaner & Polish with small, light circular motions using a soft cotton cloth. Insure the clear vinyl panels are free of abrasives. Very lightly mist a soft cotton cloth. Lightly and briskly rub a manageable sized area and then lightly buff dry with another clean cloth.
