

# SWCHRC PREAMBLE

Welcome to the Southwest Columbus Ham Radio Club 2 meter net.

We meet here every Thursday night at 8:30 Eastern time on this frequency 145.23 for our club net.

All amateurs are not only welcome but encouraged to join us.

Before we get started does anyone need to use the frequency or is there any emergency traffic ? If so please call net control now.

Pause briefly.

This is a directed net so please run all traffic through net control.

We also use a program called Netlogger so you can electronically follow along with the list of participants. Please check out [Netlogger.org](http://Netlogger.org) for a free download of this program.

You can view our club website at [SWCHRC.ORG](http://SWCHRC.ORG).

Does anyone have any announcements to make or any info for the club.

Hearing nothing let's take a round of check in's, please come now with your call signs.
