

EOC Basic Course Description
Emergency Operation Center (EOC Basic) for All-Hazards Events

March 9, 10:00 – 1:00 CEOC

This course offers participants insight into, and practical experience with, emergency management operations and decision-making skills necessary to work effectively in an EOC. This course will also introduce participants to the support the Incident Command System (ICS). The course offers the opportunity for participants to practice emergency management skills and to gain practical experience. Each participant will gain a better understanding of the crisis management and skills necessary to effectively coordinate support for any type of event.

Course Objectives:

• Identify how entities within the EOC are interconnected to any type of incident throughout all levels of response and government
• Differentiate between the various functions of, and within, an Emergency Operations Center (EOC)
• Discern how the choice of an EOC organizational model affects the performance of EOC functions and where they occur in the EOC
• Understand the law for use of the Standardized Emergency Management System's basic functions
• Understand the function of the Management Staff positions, and Public Information Officer, Liaison Officer and Safety Officer functions
• Perform the resource management functions
• Perform the planning functions
• Operate within an Emergency Operations Center (EOC) to support response to a simulated large-scale incident
