

Rule 59 Protocol: Emergency Response Team

School: _____

The staff members below have received education and training in order to respond to a breathing emergency and administering the protocol: Emergency Response to Life-Threatening Asthma or Systemic Allergic Reactions (Anaphylaxis) (NDE – Title 92 NAC Chapter 59).

Training given by: _____ Date: _____

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____

Each school building will be unique in how the Emergency Response Team is notified of a breathing emergency. Know your building, have pre-determined roles for the team and make a plan for this type of emergency.

NOTE: AIRE Nebraska recommends that, at least, three persons are trained per building. Education and training is suggested to be done annually by a qualified trainer. These persons will also be trained in CPR. General education is also recommended for the entire school staff. Education and training specific to the protocol can be found at www.airenebraska.org
