Plano, Illinois 60545

JULY 20

5:00 PM to 1:00 AM

Laura was rushed to the hospital by ambulance with heart issues on May 25th. She was released after a pacemaker was placed. She was then readmitted on May 31st due to complications and transferred to the University of Chicago Health Center on June 4th. There, she was diagnosed with a rare autoimmune disease called Giant Cell Myocarditis. She is currently being treated for liver and kidney failure while awaiting a heart transplant.

These funds will help the Melcher family with hospital bills, further treatment, and household care while the family is at Laura's side.

Thank you for your support during this emotional time.
