## MACRO PHOTOGRAPHY FOR CRIME SCENE RESPONDERS

**September 11-12, 2017**

### **Tuition Special!**

Register with tuition paid before Sept. 10: \$249/Student  
Billing option for tuition after class starts: \$299/Student  
Full-time collegiate students: \$200/student (with Student ID)

### ABOUT THIS COURSE

In this comprehensive 2-day (16 hour) class, crime scene responders, field investigators, and laboratory personnel will learn the techniques of Macro, or evidentiary, Photography. Macro Photography has become a vital skill for forensic science practitioners with the evolution of digital imaging within the laboratory. Impression evidence is being enhanced and compared more frequently in a digital environment. Starting at the crime scene, the entire examination process begins with the ability of the practitioner to effectively capture the impression photographically, to allow for a thorough analysis and comparison to be performed.

Whether photographing evidence within the confines of the forensic laboratory or at a crime scene, the techniques discussed in this class will allow practitioners to photograph evidence in situ, without moving or damaging the object for collection. The principles discussed in this class will give students the necessary knowledge to be able to collect this type of evidence in its original state. From latent prints to tiremark impressions, attendees will learn how to operate their cameras and utilize lighting systems in order to obtain the best quality photograph for examination purposes. Through a hybrid learning environment of classroom lecture and a hands-on practical component. Students will learn the background of macro photography, the various camera settings, and multiple lighting systems to best visualize and capture impression evidence.

This course has been approved by the Crime Scene Certification Board for continuing education towards the certification programs.

### ABOUT YOUR INSTRUCTOR:

Andrew R. Reitnauer is a Certified Senior Crime Scene Analyst (CSCSA) through the International Association for Identification. For the past 12 years, he has been an active Latent Print Examiner, Crime Scene Responder, and Section Supervisor. In addition to casework duties, Andrew has also served as a primary trainer for new examiners and outside agencies. He is a Past- President of the New York Division of the IAI and is an active member of multiple IAI Divisions and organizations.
