

Title:

Rethinking Patient Care in Endometrial and Cervical Cancer: How Nurses Can Lead the Targeted and Immunotherapeutic Revolution

Speaker:

Kimberly Halla, MSN, FNP-C
Family Nurse Practitioner
Arizona Oncology Associates PC
Scottsdale, Arizona

Objectives:

- * Summarize the current treatment and regulatory landscape in the management of gynecologic cancers, including the role of novel targeted, immunotherapeutic, and combination approaches in cervical and endometrial cancers
- * Describe safety and efficacy evidence surrounding targeted, immune checkpoint inhibitor, and combination strategies for the management of gynecologic cancers
- * Educate patients about therapeutic and safety considerations associated with recently approved and emerging options for endometrial and cervical cancers
- * Manage the unique spectrum of adverse events associated with targeted and immunotherapy used to treat endometrial and cervical cancers
