

Daisy

DOB 08/18/02

I adopted Daisy and Bailey together in 2004. Daisy has always strived to please and is exceptionally obedient for a beagle. :o) Daisy was initially trained in trailing and although she did a good job I did not know enough at the time achieve certification with her in trailing. I switched Daisy to USAR and she was a natural on the rubble pile and agility equipment. Daisy even taught Audi how to climb on a rubble pile. Daisy obtained certifications through NASAR in Area Search type II and Disaster live find type IV. Daisy turned 10 in 2012 and moved to the elite position of retirement.
