

PROJECT NAME: OHIO RIVER GREENWAYS

PROJECT OWNER:

US Army Corps of Engineers

PROJECT LOCATION:

New Albany, Indiana
Clarksville, Indiana

Project Description:

Standing Stone team members were part of a team to develop portions of a trail system along the Ohio River in both New Albany and Clarksville Indiana. Team members participated in a planning session to provide guidance on protecting the public while they used the trail system including:

- General users, perception and comfort
- Criminal user group, enticement and discouragements
- Rescue users, options for response, victim locating and communication.
- Impact on local area
- Design and construction alternatives
- Policing and patrolling methods
- Lighting
- Maintenance issues
- Safety signage
- Self response guidance
- Territoriality
- Unclaimed space avoidance (i.e. filling in with prickly foliage to eliminate foreseeable concealment areas for rapist/pedophiles)

The results were provided in a written security analysis of the greenway route area and its safety implications as noted above.

Team Members and Project Role:

Ian Thompson	Project Manager
Lori Thompson	Senior Consultant
Jim Hyslop	Quality Assurance/Quality Control
