tact

Tact

Definition: sensitive mental or aesthetic perception. This is what you will sense when sitting in one. 3D knit that embraces your back, discreet adjustable lumbar option, Suspension Technique on the seat. It is available as a task chair, conference, side or stool. There is one that will suit you. Absolute comfort at an affordable price.

tact

..... **Tact** with adjustable lumbar option

Advanced ergonomic options

With options of multi-function or synchro-tilt mechanisms, multi-adjustable or articulated swing arms, 3 seat sizes, 2 back heights and adjustable lumbar, the Tact is well suited for ergonomic applications.

Knit Back

Contrary to regular mesh backs, the three dimensional knit back distributes weight evenly in all directions. This allows the knit to self-adjust and take the shape of the users back, providing optimal support.

Tact side chair

A great complement to your working environment, as a waiting room or companion chair. It is also available with casters on all four legs to fill your meeting room requirements.
