

Power Wheelchair Electronics: Making a Difference Today and Tomorrow

Length: 2 Hour

Description:

A power wheelchair is no longer just motors, batteries and a joystick. As commercially available power wheelchair electronics continue to evolve, we are seeing new and innovative features and functionality integrated into these systems. This course will focus on how the evolution of power wheelchair electronics is making a difference in people's lives. Improved connectivity, touch screen technology, live and wireless programming, real time diagnostics, data tracking and monitoring, these and other advancements will be detailed and discussed.
