FEEDING DIRECTIONS

Feed continuously at the rate of 1 to 4.6 lb to provide not less than 15 mg nor more than 70 mg of lasalocid per head per day depending on body weight. Provide clean, fresh water at all times.

CAUTION: Do not allow horses or other equines access to formulations containing lasalocid as ingestion may be fatal. The safety of lasalocid in unapproved species and breeding animals has not been established. This feed contains a source of non-protein nitrogen. The equivalent protein supplied by non-protein nitrogen should not exceed 1/3 of the crude protein of the total ration. Use only as directed. For ruminants (cattle, sheep, and goats) only.

No copper compounds are added to this feed. However, naturally occurring copper in feed ingredients may combine to yield detectable copper levels. Care should be taken to minimize additional copper from forage, water or other feed stuffs available to sheep.
