from Boutique Recovery Strategies to Enterprise-wide Solutions

Disaster Readiness Compliance Auditing and Testing

Successful Disaster Recovery and Business Continuity (BC/DR) programs are not one instituted at Time of Disaster but have been built in advance, from the ground up through thoughtful preparation, planning, delivery of services, and regulatory compliance.

Disaster Readiness Solutions delivers the program planning, analysis, requirements gathering, and testing expertise to confirm your systems can be recovered in a Disaster, and ensure your BC/DR Programs are Regulatory Strong and Compliant.

Recovery and Continuity Program Testing

You have a BC/DR program, but have you tested it? Do the Recovery Plans work and will systems be recovered in the time designated by the systems' Recovery Time Objectives (RTO)? Can data be restored and available within its designated Recovery Point Objectives (RPO)?

Organizations are at risk of financial loss, damage of reputation, and potential business failure if victim to a catastrophic disaster or extended systems outage, due to.

- Not having active BC/DR Programs in place.
- Not keeping their programs current.
- Having invalidated, incorrect or unrealistic support plans.
- Not testing their programs on a regular basis.
- Not testing to ensure RTO's and RPO's are achievable.
- Lack of established and repeatable BC/DR testing.
- Lack equipment and tools for critical system recovery; especially in the area of hardware, network bandwidth, data replication, and workstation mobility.

Successful Disaster Recovery testing requires effective planning, design, and execution in order to ensure systems are restored; recovery plans are accurate and are in with alignment the organization's Business Continuity program recovery solution.

Disaster Recovery Solutions will deliver effective and repeatable test principles based on over two decades testing experience and excellence.

- Prepare and conduct testing of your program.
- Design tests based on your organization's recovery scenarios classroom-styled Structured Walk-Throughs.
    - Organization-wide or Single System Outages.
    - Classroom-style Structured Walk-Throughs.
    - Non-Disaster Operational Recoveries.
- Identify incorrect assumptions in your organization's Recovery and Continuity Plans and Strategies.

Program Reviews and Auditing

Have *Disaster Readiness Solutions* conduct an audit of your recovery and continuity programs.

- Determine regulatory and audit compliance.
- Are RTO's and RPO's set based on an established, repeatable process?
- Identify potential gaps and audit exceptions.
- Recommend solutions to fill gaps in compliance; develop Contingency Plans to mitigate the gaps until resolved.
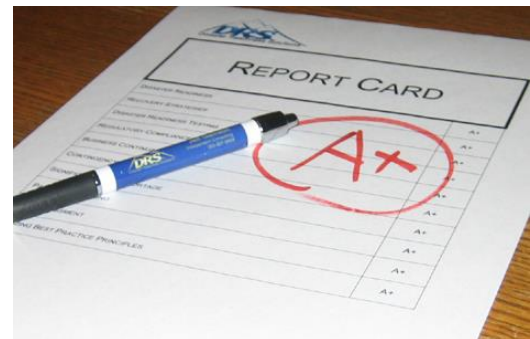

Determine your Staff's Readiness in an Outage

Due of cutbacks, job loss or navigating through lean operations, organizations may lack sufficient coverage or depth to effectively work through an extended staff shortage caused by a Pandemic, Inclement Weather or a Disaster.

Have *Disaster Readiness Solutions* conduct a *Staff Readiness Analysis* to determine strengths and potential improvements.

- Determine staff readiness by department, or team.
- Identify strengths and gaps.
- Develop Cross Training plans to strengthen depth.
- Establish Contingency Plans to cover staffing gaps.
