

## **"Summer Flight School"**

Phil Hamil (coordinator)

Students will be highly engaged using STEM (Science, Technology, Engineering and Math) activities to discover the science and history behind flight, learn to safely pilot radio-controlled aircraft (airplanes and drones) and the usefulness of the various flight platforms in our daily lives and community. The week ends with a field trip to a local airport! Grades 5-8, 12 students served. June 18-22, 2018, 9 am - 12 pm
