

Browning BOWS

In selecting a bow be sure to specify the following:

1. Model by name.
2. Whether a left or right hand model.
3. Draw Weight (to complete orders promptly Browning Arms Company will substitute within two pounds on either side of designated weight unless an order specifies "Exactly 00 lbs." or the substitution limits permissible). Since Apache and Mohawk bow draw weights are in increments of five lbs., substitutions will not be made unless the dealer so states.
4. For Olympian and Safari bows specify length.

Olympian	68"	From 30 to 60	From 28" to 33"	33"	9¾"	63¾"	7"		White

All bows have a full working recurve except the Mohawk and Apache models. The Olympian, Trophy, Explorer, Safari, and Apollo are furnished in a soft, protective cloth bag.

All models except the Apache are sold with a brush type arrow rest which can easily be removed by those who prefer other types of arrow rests or none at all.

[Ⓢ]All draw weights are taken at a draw of 28" except the Apache which is taken at 24". All bows are offered for either right or left handed shooters.

[Ⓢ]These are recommended maximum draw lengths for pleasant performance.

[Ⓢ]The face of the bow is defined as the surface nearest the string when bow is strung. The back is the opposite surface.
