

Adventure Light Youth Outreach

What Makes Us Different!

Parents, Guardians, Future Leaders,

This is a brief summary of who we are! We invite you to take the next step and partner with us while we strive to provide the best programs for our youth.

Leadership

We are a youth led organization under the guidance of program directors. By giving the members ownership in their program, leadership development is built into the program.

Focus and Purpose

Alyouth is committed to developing, guiding and mentoring young people through the steps necessary to be successful as they transition to a purpose filled adult life. We will accomplish our goal by providing all participants with the program explained below.

Many great programs exist within schools and communities that meet the developmental needs of young adults. These programs may not be of interest or inviting to some of our youth. For many reasons they may not have been drawn to these groups. Their reasons may include a lack of opportunity or possibly opting out of joining due to their own personal reasons. While in high school, many find themselves very uncertain about their next steps in life. As a post graduate who has not been encouraged or supported, they may feel unprepared, insecure, confused and lacking the confidence needed to succeed. Peer support may be difficult to find since others may also feel the same way. Many of our youth lack adult mentors whom they respect and trust. Our focus will be to provide adult mentoring.

Programs

Adventure Light Youth, also referred to as Alyouth, has five programmed areas of interest; adventure, service, travel, mission and career learning. We offer a nice balance of experiences which we believe are necessary and unique. When members join our organization they are compelled to develop creative thinking and organizational skills which will allow them to work towards individual and group goals. They will learn how to take on a challenge, develop plans for achieving goals, set and meet deadlines, etc..

There will be member planned outings, high adventure trips and educational experiences. Participants will 'give and serve' in their community. Mini career workshops will be provided to peak interests and opportunities. Through direct contact and involvement in mission experiences, our youth will come to appreciate the opportunities and benefits which are already available to them in this country, which they have often taken for granted.
