

# Capital Project Review & Assistance

CEES-Advisors helps clients bridge the gap between energy audits and project completion so they can achieve their goals of saving energy, reducing operating costs and improving facility operation.

## Building on Success

Our Capital Project Review & Assistance Services have grown out of our close relationship and trust with clients.

Having seen the quality engineering, planning, and analysis we put into our energy audits, clients have asked CEES-Advisors to help navigate projects from planning stages through design to completion.

As an owner's representative, CEES-Advisors can evaluate and choose the best implementation approach and project delivery option for your situation. We assist clients to ensure that projects;

- Fulfill the design intent,
- Reduce energy use, peak demand, and operating costs,
- Improve or maintain indoor air quality standards and occupant comfort, and
- Satisfy expectations.

## Tailored Services

Based on the following portfolio of services, we can tailor the appropriate level of assistance to meet your needs. Our energy professionals and project managers can assist with:

- Developing a scope of work
- Planning an implementation approach
- Project management
- Evaluating financing options (including utility incentives and rebates)
- Construction Management
- Measurement & Verification
