

MADE IN THE USA. READY TO SHIP WITHIN 48 HOURS.

HEALTH PARTITIONS

Bon Chef's new restaurant table and room/lobby partitions are the perfect solution to protect your guests while they are dining. Configure in tandem or create private spaces.

the FUTURE OF DINING STARTS NOW.

Covid 19 Virus

I have been in the Hospitality Industry for 57 years and 48 of them the proud owner of Bon Chef.

I have seen it all from many recessions including the worldwide 2008 recession, 911, and now this pandemic. I love this industry and I know it will come back because as Americans we don't quit.

Restaurants need to make their customers feel safe. I have been focusing on manufacturing products that will make the restaurant diner feel safe after we are all allowed to go back to work and go to our favorite eateries.

Reducing the occupancy of restaurants is not the long term answer. It will cause financial hardships to an industry that already has a difficult time maintaining profit.

Bon Chef has come up with an attractive table partition that will keep your customers feeling safe while providing the social barrier that is required .

Our table partitions are attractive and can offer an element of privacy and yet still give an open feeling. They can be connected together making a straight wall between tables or completely surrounding a table on three sides offering even more protection.

We need to all think out of our comfort zone and fight this horrible event.
We will beat this and come back stronger than ever.

Sal Torre
