SENIOR ADVANCED SOFTWARE ENGINEER – SCOTTSDALE, ARIZONA

WEBCO HR, Inc. is seeking a Senior Advanced Software Engineer for one of our clients located in Scottsdale, Arizona.

SUMMARY:

Ready to be a leader with the company that is committed to pushing the limits of truly advanced technologies? At our client's company, they create the products and services that help our service members, intelligence analysts and first responders keep our nation safe. The work they do is so advanced, it's often classified. If you want to put your talent in the spotlight, it's waiting for you right now, right here.

They apply advanced technologies such as Artificial Intelligence, Blockchain, AR/VR, Cloud Native and Quantum Physics to solve our customers' missions in cyber, RF, undersea, interstellar space and everything in between.

RESPONSIBILITIES:

As a Senior Advanced Software Engineer, you'll lead a team of extraordinary talent. Together you'll perform software requirements analysis, lead research and design, and develop and test software and tools. From inventing new products or enhancing existing applications, your talent and leadership abilities will be front and center.

What you'll experience:

- Technologies that aren't just top-notch, they're often top-secret.
- A team of bold thinkers committed to exploring what's next.
- Opportunities to gain new knowledge - as it's discovered

REQUIREMENTS:

- A Bachelor's in software engineering or a related technical field and a minimum of 8 years of relevant experience or a Master's degree and a minimum of 6 years of relevant experience; Agile experience preferred.
- Thorough understanding of software engineering concepts, principles, and theories.
- Expert at applying technical standards and methodologies to resolve issues in creative ways and help company meet financial and business objectives.
- Very strong knowledge of software tools supporting Integrated Development Environments (IDE), version control, defect reporting and scripting.
- Very strong knowledge of technology trends and the ability to champion new ideas, products and process improvements.
- Ability to effectively handle complex assignments.

- Creative thinking with the ability to effectively multi-task

COMPENSATION:

- Base Salary
- Full Benefits

THE COMPANY:

Our client engineers a diverse portfolio of high technology solutions, products and services that enable customers to successfully execute missions across all domains of operation. With a global team of 12,000+ top professionals, we partner with the best in industry to expand the bounds of innovation in the defense and scientific arenas. Given the nature of their work and who they are, they value trust, honesty, alignment and transparency. They offer highly competitive benefits and pride themselves in being a great place to work with a shared sense of purpose. You will also enjoy a flexible work environment where contributions are recognized and rewarded. If who they are and what they do resonates with you, we invite you to join our high performance team!
