iPROJECTION Wirelessly Project from your Chromebook, iOS,

or Android™ mobile device with the Epson iProjection App.

This application allows you to travel lightly and present anywhere from your devices. The Epson iProjection app will enable you to have the wireless freedom you've come to expect from your mobile device. The app is easy to use and navigate with intuitive menu options that help bring Chromebook, iOS, and Android™ content to the big screen. iProjection for Chromebooks supports fully mirrored display of all your Chromebook content including Google Docs, Slides, Sheets, and Chrome browser. When used in conjunction with Epson Multi-PC Projection with Moderator function the iProjection App gives teachers the ability to display up to four Chromebook™ computers simultaneously.

SHORT THROW

AND ULTRA SHORT THROW

With an Epson short throw or ultra short throw projector, presenters are able to deliver rich multimedia content without the distraction of glare in their eyes, or shadows on the board disrupting the vision of their audience.

Make the most of your available space with Epson's range of innovative projectors.

EDUCATION MODELS

The Epson range of Ultra Short Throw projectors are available in an Education specific configuration; denoted by an "e" on the end of the name.

VISIT WWW.EPSON.COM.AU FOR MORE INFORMATION.

DOCUMENT CAMERA CONTROL

Connect the Epson ELP-DC21 document camera to an interactive EB-600 Series projector to easily capture and displays books, 3D objects and experiments. You can also add annotations directly to a projected live image without the need of a PC. To simplify the process you can operate the document camera from the toolbar on the projection screen.

BUSINESS INTERACTIVE

MeetingMate™ interactive projectors provide the complete solution for any meeting room.

A perfect alternative to copyboards and other presentation equipment, MeetingMate[™] combines multiple devices into one simple device that enhances collaboration through interactive functionality, idea creation and content sharing — all without a PC!

^{*} ALL DEVICES MUST BE CONNECTED ON THE SAME NETWORK

WWW.EPSON.COM.AU/GOBIGWITHEPSON

Size Matters

Every Inch Matters

Display sizes are measured diagonally, from corner to corner. As a result, a 100" Display is actually 4 times larger than a 50"Display.*

WWW.EPSON.COM.AU/GOBIGWITHEPSON

LARGE VENUE

Powerful performers that are easy to install, manage and maintain. Epson's range of installation projectors offers up to 25,000 lumens of colour/white light output for captivating presentations in virtually any venue. Featuring WUXGA resolution and innovative 3LCD technology, these projectors deliver brilliant images in lecture halls, conference centres and entertainment venues.

WIRELESS HD

Eliminate cable clutter and simplify

installations! WirelessHD enables the transfer of HDMI digital signals without compression or deterioration. You can now wirelessly stream Full HD and 3D content directly to your Epson projector, giving you high quality images every time.

EPSON 3D

Enjoy thrilling 3D adventures right in the comfort of your living room.

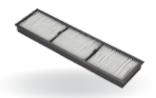

Featuring Epson's Bright 3D Drive technology, these home theatre projectors put you right in the middle of the action. Epson's drive system minimises the blackout time of 3D glasses and provides greater brightness when viewing 3D content.

COLOUR LIGHT OUTPUT

KNOW YOUR PROJECTOR LUMENS

WHAT IS COLOUR BRIGHTNESS?

Many people are in the dark about colour brightness. Of the numerous specifications to consider when purchasing a projector, this measure of colour light output is among the most important.

COLOUR BRIGHTNESS

is a scientifically set global standard that measures a projector's Colour Light Output. This measure is crucial to gauge the performance of a projector.

Low Colour Brightness can result in images that are 1/3 as bright!

COLOUR BRIGHTNESS COUNTS

Colour is the keystone of any memorable presentation, increasing memory significantly over monochromatic visuals

Colours at peak brightness and saturation attract the most attention

97% of consumers agree that brightness is a key component of image quality

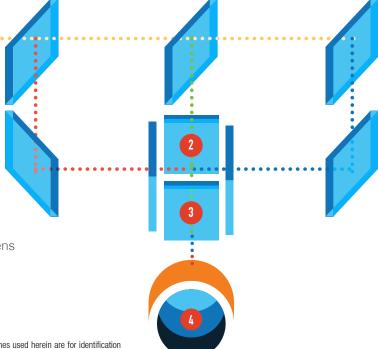

3LCD TECHNOLOGY_

Not All Projectors Are Created Equal. Using 3LCD technology means that you don't have to sacrifice the vibrancy of rich multimedia by projecting a single colour at a time.

43LCD

HERE'S HOW IT WORKS:

- A light source projects white light onto a combination of mirrors that split the light into three primary colours: red, green and blue
- Each primary colour passes through a dedicated LCD panel
- The three colour images are combined using a prism to form a full-colour image consisting of millions of colours
- The vibrant, full-colour image passes through a lens and is projected onto a screen
